I Burn that I may be of Use...

“THERE is no better, there is no more open door by which you can enter into the study of natural philosophy, than by considering the physical phenomena of a candle.’ Michael Faraday spoke these words more than a century ago to an audience of young people at the Royal Institute. They would be equally appropriate today in many high schools throughout our land where students are introduced to chemistry by being asked to make and record detailed observations of a burning candle. The making and recording of detailed observations is a fundamental activity of science, and is something which you must consider essential throughout your professional careers,” stated keynote speaker Dr. Louis J. Hampton in addressing those assembled for Opening Exercises of the 141st Annual Session of the

Jefferson Medical College on Monday evening, September 14th in McClellan Hall.

Dr. Peter A. Herbut, Professor of Pathology and Head of the Department, in introducing Dr. Hampton said, “To those of us more closely associated with Jefferson, Professor Hampton needs no introduction. To the guests and incoming students, however, he may not be known quite as well and so I shall try to present a brief résumé of his attainments.

“Professor Hampton is a native of our state, being born in Loysville, Pa. He obtained a B.S. degree in 1929 from Franklin and Marshall College and an M.D. degree in 1933 from the University of Pennsylvania.

“He interned at the Presbyterian Hospital in Philadelphia from 1933-35 after which he joined the staff

Dr. Hampton

of the Monroe County General Hospital in East Stroudsburg, Pa. Here he stayed until 1941. During this period he took postgraduate training in Cardiology and Anesthesiology at the Graduate Hospital and the University of Pennsylvania.

"The war years he spent with the U.S. Army at the Station Hospital, Camp Lee, Va., the First Evacuation Hospital, and the Walter Reed Hospital. He completed his training in Anesthesiology in 1945-46 at the Hartford Hospital, Hartford, Conn. From 1946-55 he progressed from the rank of Instructor to that of Associate Professor of Anesthesiology at Yale University School of Medicine. During this period he was Attending Anesthesiologist at the New Haven Community Hospital, and Consultant in Anesthesiology at the West Haven Veterans Administration Hospital and the Milford Hospital—all in Connecticut. Jefferson was most fortunate in obtaining him as Professor and Head of the newly created Department of Anesthesiology on July 1, 1955.

a man of achievements

"Professionally, Professor Hampton has many achievements. He was certified by the American Board of Anesthesiology in 1947. He belongs to many medical societies including the American Society of Anesthesiologists and the International Anesthesia Research Society. He has contributed extensively to medical literature. He is past-president of the Connecticut State Society of Anesthesiologists and the Philadelphia Society of Anesthesiologists. Currently, he is Chairman of the Anesthesia Study Commission of the Philadelphia County Medical Society and Director of the American Society of Anesthesiologists representing Pennsylvania. He has had several tours of active duty in the U.S. Army Reserve since World War II and holds the rank of Colonel, M.C., USAR (Retired).

Dr. Herbut

review the program.*

He came out of it with a wrecked car, a fractured jaw, an injured wrist, and (by his own admission) a depletion of some of the few remaining Betz's cells of his cerebral cortex. His greatest frustration, in the ensuing weeks, was not the material destruction, not the financial loss, and not, no, not even the physical pain. It was his inability to express himself in his usual, uninhibited, colorful manner. You see, his jaw was wired and, for the first time since he was an infant, he could speak only in muffled tones."

the title

Dr. Hampton prefaced his speech with an explanation of the title's origin. "Several weeks ago when the Dean's office, in its usual bill collector fashion, had served me with final notice for a title of this address, I sought the advice of one of Jefferson's scholars. His response was, 'Name it anything. No one ever listens to these speeches. Don't tell me you do!' Unexpected though it was, this advice was none the less heartening, and when I came upon this legend from the bookplate of a great Scottish writer, I submitted it as the title, confident no one before me had used it on a similar occasion. But as the day of reckoning neared when something had to be written beneath it, the implications of the title seemed too obvious. How often have medical students, and new ones at that, been admonished to burn the midnight oil! And what physician has not figuratively burned the candle at both ends while cautioning his patients not to do so! Indeed, the physician's lot is

"He is married to the most charming former Elinor Dunbar. He has two daughters, one son, and six grandchildren. He lives in Penn Valley but spends much of his time at his Mountain Paradise, a once-abandoned 80-acre farm in the Poconos, to which he has given the poetic name of Whippoorwill Hill but which his friends call a "pile of rock". Here he has numerous seedling evergreens which someday he hopes to sell, an ice-cold swimming pool which he never uses, a great variety of birds and wild flowers concerning which he knows precious little, and a rampant crop of weeds about which he does nothing.

"On Thanksgiving, 1963, he was in a serious end-to-side automobile accident near Wilmington, Delaware.

one of work, and in service to his fellow man he, like the candle, may be consumed. This is the connotation one might apply to the title, but since I am frequently averse to performing as expected, and fortified by our medical librarian's authoritative statement that no one listens anyway, I shall proceed on a different tack.

"In the short time allotted this evening let us look at this burning candle—MEDICINE—and record a few of our observations. If sufficient detail is lacking in any of them it be the result of lack of time, or the inability of the observer adequately to perceive.

the flame

"Obvious to each of us is the flame, or at least that part of it which gives off light, and who of us in this gathering of the elite would deny this represents the physician! If the function of the candle is to produce light, so the function of MEDICINE is to provide health, and the ultimate purveyor of health is the physician."

Dr. Hampton continued, pointing out, "While medical schools and specialty groups have often been blamed for the decline in numbers of general practitioners, an enlightened public (the consumer) has added to the trend by turning to specialists in increasing numbers,

Mr. Brown with the aid of many hands is pinned into his academic regalia.

Mr. Large congratulates the recipients of the Undergraduate Awards.

Mr. Bodine

realizing that no one man can encompass all of medicine. Therefore, it is likely that the best medical care can be provided by groups (in which a so-called 'generalist' may play an important role): in groups, be they in clinics, in community hospitals, or in the more complex medical centers.

paramedical personnel

"There is another part of the flame which we all too often ignore because it glows less noticeably. And yet it is the base, an integral part of the flame. This represents the paramedical personnel—nurses, administrators, technicians, to name but a few. Think how ineffective, or at least inefficient, is our service to patients in face of tremendous nursing shortages. All you need to have this brought home to you is to be a patient in this or any of

A captive audience disproves the theory that "no one ever listens."

a hundred similar hospitals, in this country or abroad. Some years ago, on a similar occasion, Dr. Thaddeus Montgomery suggested the drafting of young women into nursing, as young men are drafted into military service. I like the way Alan Gregg stated the case: 'I do not find any cogent arguments against such a resolution of the present immense problem of nursing care; the psychological resistance and the emotional resentment would be real, but just what do young women do in return for citizenship?'

"It is high time that we gave more recognition to these so-called ancillary, or paramedical personnel. The health 'industry' is the third largest in the nation in terms of numbers of people employed, and of these, physicians count for less than ten per cent. Since so much of the work of MEDICINE is done by people who are not physicians, it is only reasonable to assume that improvement of the training of these people will result in better service at all levels. We should welcome them as colleagues if we want them to go on sharing with us that very important professional code according to which the patient's interests come first.

the wick

"Coming next to the wick, I shall say it represents the educational facility—medical school, teaching hospital—for from it the flame is propagated. And if you protest the likeness does not do justice to the role of education in medical care, please remember how much is buried from view, and how vital is the role of that which is visible in determining the amount of light which is produced. (I shall not dwell on the observation that as the candle burns the wick gradually bends. Perhaps this is related to the current frenzy of revising curricula!)

"Students today, more than ever before, are presented with an amazing array of facts. There is always the danger that in trying to absorb them, they will not allot time to learn the principles by which these facts are applied in service to man. The faculty has an obligation to inculcate in the student a scientific method of thought and to stimulate him to use this so that he may learn for himself and continue to do so throughout his professional

*Dr. Sodeman and Mr. Bodine greet the students
and their families at the reception.*

*Turn night-time into day-time
With the sunlight of good cheer
For it's always fair weather
When good fellows get together*
(RICHARD HOVEY)

career. I doubt this can be done effectively in a system where every student is expected to be exposed to the same facts and where he is graded numerically on his ability to spew back these facts in a written examination. Moreover, I think the student is denied a worthwhile experience in motivation to self education when his time for an elective is limited to that allotted for vacation or to a paltry hour on a Saturday morning.

the tallow

"And finally we come to the tallow, or wax, which serves as the source material from which combustion and the flame are derived. This is, first of all, knowledge. Knowledge acquired over centuries and painstakingly incorporated in our way of life; and knowledge acquired in recent day research, piled in mountains of charts and graphs and computer tape, that we have not yet begun to understand. This tallow also is money and effort—financial support, private and public—by which teachers and investigators acquire knowledge and train others who apply it in service.

what dims the flame

"In this allegorical exercise I have had to gloss over many observations which were worthy of more comment because time—or rather lack of it—demanded some obeisance to brevity. I cannot close, however, without considering one additional phenomenon of the burning candle. What substance when lacking prevents combustion, and when present in low supply dims the flame? Oxygen. We do not see it, yet we know it must be there.

"And in MEDICINE, what? At the level of the individual, understanding; not only care of, but care for the patient. To be scientific one need not be impersonal in his relationship with people who come to him for help, and indeed he must be interested in the social, cultural and humane factors in disease. Fragmentation of knowledge with pursuit of excellence in one's field may make it difficult for some specialists to comprehend man as a complete living entity, responsive to his environment,

but this is no excuse for showing a lack of human kindness in serving him.

"And if at the individual level there must be understanding, as a group we must remember that we have an unwritten contract with society which delegates to us the responsibility for helping it cope with individual and collective health problems. We see in the evolution of man's social and political conscience a view of medicine as a function of the whole of society and as such transcends the proprietary interests of the practicing professions, hospitals and educational institutions. There is genuine concern, with our profession and certainly elsewhere, that what MEDICINE knows is not matched by what MEDICINE does for society.

the problems

"Let me illustrate, briefly, by naming some of the problems confronting us in providing total medical care.

"We are reminded constantly of the increasing cost, and find much of this due to rising costs of hospitalization. Most of this is unavoidable, but consider the impact of the rise of several small proprietary hospitals, built not so much for service as for profit. Consider, also, the factor of rivalry among larger institutions in the duplication of expensive services that might better be concentrated in one.

"The impact of the nursing shortage has been described.

"Our profession has the responsibility of bringing the highest quality medical care to every person at a price each can pay. To do this raises problems that cannot be solved by the medical profession alone, but we should assume leadership in trying to find a solution. The official spokesman for American Medicine, the American Medical Association, once socially progressive, has, since 1920, been repeatedly reactionary in its socioeconomic policy. It attacked successively group practice, voluntary pre-payment plans for hospitalization and then medical care (Blue Cross and Blue Shield) until each had achieved success. This is not to condemn its stand against the King-Anderson bill, but rather a plea to make such bills unnecessary by assuming a more positive approach in trying to meet the needs of society.

"And now, lest I, too, be condemned for being negativistic, in that I have emphasized problems, please accept them as challenges—something to make you think. We, your elders, need your help. We'll let you in on the mysteries of the aspirin tablet, if you'll help find a plan to finance medical care for the aged.

"Oh yes. The title. The bookplate of Thomas Carlyle shows a burning candle beneath which is the simple legend: 'I burn that I may be of use.'"

President William A. Bodine, Jr., in his introductory remarks, stated that the freshman class numbers 176 and represents the top seven per cent of the more than 2,300 applicants. The members of the class come from 15 states and Puerto Rico and include representatives of 69 different colleges. Twelve are sons of former Jefferson graduates.

financial obligations

Referring to the financial obligations of the student, he commented that Jefferson is able to provide the students with the finest medical education for a tuition charge of \$1,300 annually—as compared to the actual cost per student which is in excess of \$6,100, exclusive of the sponsored research projects carried out by members of the Faculty.

He told the freshmen that during their four years at Jefferson they would witness the implementation of Jefferson's \$41 million development program, first with the construction of the new Basic Science—Student Commons building followed by the residential facilities.

Following Mr. Bodine's remarks, Dr. William A. Sodeman, Dean and Vice President for Medical Affairs, told the audience, "Opening Session is always an exciting time to me. To welcome 165 young men and 11 young women into the lifelong study of Medicine is a very significant event. To add to this a welcome to 42 students working in the Basic Sciences for their Masters and Ph.D. degrees lets one know how far-reaching our activities in the health centers at Jefferson really are. Just last Saturday, at the School of Nursing graduation ceremonies, 74 young ladies passed into active participation in patient care, and this last July 1 we welcomed 23 interns and 143 residents and fellows into a new year of activity. Over 5000 physicians in practice were reached by Jefferson's Continuing Education programs this past year, and we expect this group to be greater in the year just starting.

"To the 26 of you who represent the first activity, in the Medical College, of our accelerated program with The Pennsylvania State University, we extend a hearty welcome also. This is the first time, in Jefferson history, and indeed as far as I know in any organized program, in which students, registered in two colleges at one time, have pursued courses unrelated to medicine. If the President and Trustees express some excitement about your program, you can understand the exhilaration felt by those of us on the Faculty who conceived, nurtured, and brought it into being.

changes in the faculty

"The second function of the Dean at Opening Session, beside giving words of greeting, is to let you know of the additions to and changes in our faculty in the past year.

"Our Faculty now consists of 875 members, not including the House Officers (interns, residents, and fellows) who participate actively in the teaching program as well. With 875 Faculty members and 657 undergraduate students you can see that our teaching program becomes an intimate one, despite the relatively large size of Jefferson as a Medical College. We hope to make it more so."

undergraduate awards

Mr. James M. Large, Chairman of the Board of Trustees, then presented the Undergraduate Awards: PHYSIOLOGY PRIZE to Russell Paul Seda with Honorable Mention to Lyndon Edwin Mansfield; ANATOMY PRIZE to Harvey Jay Sugarman; AMERICAN CANCER SOCIETY PRIZES, First Prize to Lewis Allen Kirshner and Second Prize to Dr. David Paul Shreiner (Class of 1964); THE BENJAMIN LEE GORDON PRIZE to Bruce Warren Weissman.

In addition to the speakers, Mr. Brandon Barringer, Chairman of the Finance Committee of the Board of Trustees, Mr. Revelle W. Brown, Member of the Board, Mr. Kenneth R. Erfft, Vice President and Treasurer of The Jefferson Medical College and Medical Center, Dr. Robert B. Nye, Associate Dean, and Dr. Samuel S. Conly, Jr., Assistant Dean, were seated on the stage.

Following the exercises in McClellan Hall, the faculty, the freshmen class, their parents, friends, and relatives were entertained at a reception in the Library.

PROMOTIONS AND NEW APPOINTMENTS, SINCE SEPTEMBER 9, 1963

PROMOTIONS

ALLAN JACOB ERSLEV, M.D., from Associate Professor of Medicine to Professor of Medicine and from Professor of Medicine to The Thomas Drake Martinez Cardeza Research Professor of Medicine (Hematology).

WILLIAM C. FRAYER, A.B., M.D., M.S. (Ophth.), from Associate Professor of Ophthalmology to Professor of Ophthalmology.

THEODORE T. TSALTAS, M.D., from Associate Professor of Pathology to Professor of Pathology.

ALBERT M. BIELE, B.S., M.D., from Assistant Professor of Clinical Psychiatry to Associate Professor of Clinical Psychiatry.

PAUL A. BOWERS, B.S., M.D., from Assistant Professor of Obstetrics and Gynecology to Associate Professor of Obstetrics and Gynecology.

RUDOLPH C. CAMISHION, B.S., M.D., from Assistant Professor of Surgery to Associate Professor of Surgery.

DOMENIC A. DEBIAS, A.B., M.A., Ph.D., from Assistant Professor of Physiology to Associate Professor of Physiology.

JACK EDEIKEN, B.S., M.D., from Assistant Professor of Radiology to Associate Professor of Radiology.

ABRAHAM FREEDMAN, M.D., from Assistant Professor of Clinical Psychiatry to Associate Professor of Clinical Psychiatry.

LOUIS A. KAZAL, B.S., Ph.D., from Assistant Professor of Physiology to Associate Professor of Physiology.

JOSEPH P. LONG, B.S., M.D., M.S. (Med.), from Assistant Professor of Obstetrics and Gynecology to Associate Professor of Obstetrics and Gynecology.

ELLIOTT L. MANCALL, B.S., M.D., from Assistant Professor of Neurology to Associate Professor of Neurology.

IVAN B. NAGY, M.D., from Assistant Professor of Psychiatry to Associate Professor of Psychiatry.

JOSEPH J. RUPP, B.S., M.D., from Associate Professor of Clinical Medicine to Associate Professor of Medicine.

JOHN J. SCHNEIDER, B.S., M.D., Ph.D., from Assistant Professor of Medicine to Associate Professor of Medicine.

HARRY L. SMITH, JR., A.B., M.S., Ph.D., from Assistant Professor of Microbiology to Associate Professor of Microbiology (effective 9/1/64).

MILTON TOPOREK, B.A., M.A., Ph.D., from Assistant Professor of Biochemistry to Associate Professor of Biochemistry (effective 7/1/64).

JAMES E. CLARK, B.A., M.D., from Associate in Clinical Medicine to Assistant Professor of Medicine.

ABRAHAM COHEN, M.D., from Associate in Clinical Medicine to Assistant Professor of Clinical Medicine.

JOSEPH K. CORSON, A.B., M.D., from Associate in Dermatology to Assistant Professor of Dermatology.

HOWARD L. FIELD, A.B., M.D., from Associate in Psychiatry to Assistant Professor of Clinical Psychiatry.

ROBERT S. GARBER, B.S., M.D., from Instructor in Psychiatry to Assistant Professor of Clinical Psychiatry.

E. KEITH HAMMOND, A.B., M.D., from Associate in Clinical Pediatrics to Assistant Professor in Pediatrics.

FARID I. HAURANI, B.A., M.D., from Associate in Medicine to Assistant Professor of Medicine.

HERBERT H. HERSKOVITZ, B.S., M.D., from Associate in Psychiatry to Assistant Professor of Clinical Psychiatry.

EDMUND L. HOUSEL, A.B., M.D., from Associate in Clinical Medicine to Assistant Professor of Clinical Medicine.

WALLACE B. HUSSONG, B.A., M.D., from Associate in Clinical Psychiatry to Assistant Professor of Clinical Psychiatry.

JOHN E. MOCK, A.B., M.D., from Associate in Clinical Psychiatry to Assistant Professor of Clinical Psychiatry.

LEON N. PRINCE, B.S., M.D., from Assistant Professor of Clinical Obstetrics and Gynecology to Assistant Professor of Obstetrics and Gynecology.

J. CLIFFORD SCOTT, B.S., M.D., from Associate in Psychiatry to Assistant Professor of Clinical Psychiatry.

GEORGE P. STUDZINSKI, B.S., M.B., Ch.B., from Instructor in Pathology to Assistant Professor of Pathology.

PAUL D. ZIMSKIND, A.B., M.D., Ph.D., from Research Associate in Urology to Assistant Professor of Urology.

ARTHUR G. BAKER, B.A., M.D., from Instructor in Medicine to Associate in Clinical Medicine.

DONALD L. CLARK, A.B., M.D., from Instructor in Anesthesiology to Associate in Anesthesiology.

HAROLD L. COLBURN, JR., A.B., M.D., from Instructor in Dermatology to Associate in Dermatology.

EDMUND E. EHRLICH, A.B., M.D., from Instructor in Medicine to Associate in Clinical Medicine.

LUIS GARCIA-BUNEL, B.A., B.S., M.D., from Instructor in Neurology to Associate in Neurology.

CHARLES H. GREENBAUM, A.B., M.D., from Instructor in Dermatology to Associate in Dermatology.

HERBERT LIPSHUTZ, A.B., M.D., from Instructor in Surgery to Associate in Surgery.

RICHARD C. PUTNAM, A.B., M.D., from Instructor in Medicine to Associate in Clinical Medicine.

GEORGE J. RESNICK, A.B., M.D., from Instructor in Medicine to Associate in Clinical Medicine.

F. LELAND ROSE, B.A., M.D., from Instructor in Obstetrics and Gynecology to Associate in Clinical Obstetrics and Gynecology.

WILLIAM A. RUTTER, B.S., M.D., from Instructor in Psychiatry to Associate in Clinical Psychiatry.

SAMUEL E. RYNES, A.B., M.D., from Instructor in Medicine to Associate in Clinical Medicine.

F. WILLIAM SUNDERMAN, JR., B.S., M.D., from Instructor in Medicine to Associate in Medicine.

GEORGE W. TRUITT, M.D., from Instructor in Medicine to Associate in Clinical Medicine.

DORIS WILLIG, M.D., from Instructor in Psychiatry to Associate in Psychiatry.

WILLIAM D. ALLISON, B.A., M.D., from Assistant in Medicine to Instructor in Medicine.

ARNOLD A. BANK, A.B., M.D., from Assistant in Neurology to Instructor in Neurology.

WESLEY WADE BARE, B.S., M.D., from Assistant in Obstetrics and Gynecology to Instructor in Obstetrics and Gynecology.

ROBERT C. BROD, A.B., M.D., from Assistant in Medicine to Instructor in Medicine.

HARRY H. BRUNT, JR., M.D., from Assistant in Psychiatry to Instructor in Psychiatry.

RACHMEL CHERNER, B.A., M.D., from Assistant in Medicine to Instructor in Medicine.

STANLEY NORMAN FARB, M.D., from Assistant in Otolaryngology to Instructor in Otolaryngology.

JACK W. FINK, B.A., M.D., from Assistant in Obstetrics and Gynecology to Instructor in Obstetrics and Gynecology.

FRANK J. GILDAY, B.S., M.D., from Assistant in Medicine to Instructor in Medicine.

WALTER GEORGE GUNN, A.B., M.D., from Assistant in Radiology to Instructor in Radiology.

ELI B. HALPERN, A.B., M.S., M.D., from Assistant in Otolaryngology to Instructor in Otolaryngology.

FRANK B. JOHNSTON, B.A., M.D., from Assistant in Medicine to Instructor in Medicine.

BENJAMIN KENDALL, B.A., M.D., from Assistant in Obstetrics and Gynecology to Instructor in Obstetrics and Gynecology.

MARVIN A. KRANE, B.A., M.A., M.D., from Assistant in Obstetrics and Gynecology to Instructor in Obstetrics and Gynecology.

LEONARD P. LANG, B.S., M.D., from Assistant in Medicine to Instructor in Medicine.

A. B. H. LEE, B.S., M.S., M.D., from Assistant in Obstetrics and Gynecology to Instructor in Obstetrics and Gynecology.

JOHN T. MAGEE, B.A., M.D., from Assistant in Medicine to Instructor in Medicine.

LEONARD M. ROSENFELD, A.B., Ph.D., from teaching Fellow in Physiology to Instructor in Physiology (effective 9/1/64).

JOHANNES C. SCHMUCK, M.D., from Assistant in Neurology to Instructor in Neurology.

WILLIAM T. SNAGG, B.S., M.D., from Assistant in Medicine to Instructor in Medicine.

SEYMOUR WAGNER, B.A., M.D., from Assistant in Otolaryngology to Instructor in Otolaryngology.

APPOINTMENTS

A. IRVING HALLOWELL, B.S., M.D., Visiting Professor of Psychiatry (Anthropology).

LAWRENCE S. KUBIE, A.B., M.D., Visiting Professor of Psychiatry.

HERMAN OSTRUM, M.D., Visiting Professor of Radiology.

KAY A. O. ELLEM, B.S., M.B.B.S., Ph.D., Associate Professor of Pathology (effective 2/1/64).

EDWARD GOTTHEIL, B.A., M.A., Ph.D., M.D., Associate Professor of Psychiatry.

H. LEONARD JONES, JR., A.B., M.D., Associate Professor of Clinical Medicine.

THOMAS R. KOSZALKA, B.A., Ph.D., Associate Professor of Radiology (Biochemistry).

ALFONSO PAREDES, B.S., M.D., Associate Professor of Psychiatry (effective 9/1/64).

RUHERI PEREZ-TAMAYO, M.D., Associate Professor of Radiology.

MARY E. SOUTHARD, B.S., M.D., Associate Professor of Radiology.

RALPH E. DWORK, B.S., M.P.H., Visiting Associate Professor of Preventive Medicine.

JAMES J. BOYLE, JR., M.D., Assistant Professor of Radiology.

THEODORE L. DEHNE, B.S., M.D., Assistant Professor of Clinical Psychiatry.

SHELDON F. GOTTLIEB, B.A., M.S., Ph.D., Assistant Professor of Physiology and Assistant Professor of Anesthesiology.

GEORGE F. GOWEN, B.A., M.D., Assistant Professor of Surgery (effective 9/1/64).

JOSEPH H. MAGEE, A.B., M.D., Assistant Professor of Medicine (effective 9/1/64).

ROBERT SNYDER, B.S., Ph.D., Assistant Professor of Pharmacology (effective 9/1/63).

FRED A. VALUSEK, A.B., M.D., Assistant Professor of Clinical Otolaryngology.

JOHN T. MILLINGTON, B.S., M.D., M.P.H., Visiting Lecturer in Preventive Medicine.

J. WILLIAM COX, M.D., Ph.D., Associate in Medicine.

AARON FINKELMAN, D.D.S., Associate in Clinical Surgery (Oral Surgery).

EDMUND C. GAULDEN, B.S., M.D., Associate in Clinical Medicine.

DAVID B. KUSNER, B.A., Associate in Radiology (Radiation Physics).

ORVILLE F. NIELSEN, A.B., M.D., Associate in Medicine.

SANDOR S. SHAPIRO, A.B., M.D., Associate in Medicine (effective 7/1/64).

MICHAEL L. SIMENHOFF, M.B., Ch.D., Associate in Medicine.

MARJORIE B. BAHNSON, B.S., M.S., Ph.D., Research Associate in Psychiatry.

GUY J. CARNABUCI, B.S., M.D., Research Associate in Dermatology.

DANURA DANIEC, M.D., Research Associate in Pediatrics (effective 9/1/64).

NARTHORN DHAMABUTRA, M.B., Research Associate in Microbiology.

RALPH V. EXLINE, A.B., M.A., Ph.D., Research Associate in Psychiatry (Psychology).

STANLEY RALPH HARRIS, M.B., L.M.S.S.A., Research Associate in Radiology (Radiation Therapy).

THOMAS R. HOUSEKNECHT, A.B., M.D., Research Associate in Psychiatry.

AGUSTIN IFARRAGUERRI, M.D., Research Associate in Psychiatry.

KESHAB D. PANT, B.A., M.S., Research Associate in Microbiology.

SHELDON R. RAPPAPORT, A.B., A.M., Ph.D., Research Associate in Psychiatry.

GEORGE M. ARNAS, B.A., M.D., Instructor in Obstetrics and Gynecology.

CLIFFORD E. BACKUP, B.A., M.D., Instructor in Psychiatry.

MURRAY S. CAPLAN, A.B., M.D., Instructor in Psychiatry.

RICHARD A. CRANDALL, B.S., M.D., Instructor in Psychiatry.

TERESA P. DOMANSKI, B.S., M.A., M.S.S., Instructor in Psychiatry (Social Service).

DONALD G. DORENCAMP, B.S., M.D., Instructor in Neurology (effective July 1965).

RICHARD G. DREWYER, B.S., M.D., Instructor in Medicine.

LEO C. FREEMAN, B.A., M.D., Instructor in Psychiatry.

ERICH J. FREIMUTH, B.S., M.D., Instructor in Neurology (effective 7/1/64).

JACK E. GITTERMAN, M.D., Instructor in Psychiatry.

IRWIN N. HASSENFELD, A.B., M.D., Instructor in Psychiatry.

WILLIAM LEE HINGSTON, SR., B.A., M.D., Instructor in Medicine.

ANN M. HIRSCHHORN, A.B., M.D., Instructor in Neurology.

RUTH R. HOLBURN, B.A., M.S., Ph.D., Instructor in Physiology.

ORA M. JONES, A.B., M.A., Ph.D., Instructor in Psychiatry (Psychology).

MARY A. JUDKINS, M.S., Instructor in Medicine (Social Service).

MALCOLM KATES, B.S., M.D., Instructor in Medicine (effective 7/1/64).

EDWIN DONALD KAUFMANN, B.A., M.D., Instructor in Medicine.

NORMAN C. LEWIS, B.S., M.D., Instructor in Obstetrics and Gynecology.

MICHAEL A. MANKO, A.B., M.D., Instructor in Medicine (effective 7/1/64).

CARL M. MANSFIELD, A.B., M.D., Instructor in Radiology.

EDWIN M. MASTERS, A.B., A.M., Ph.D., Instructor in Anatomy (effective 9/1/64).

MARY H. MCCAULLEY, B.A., M.D., Ph.D., Instructor in Psychiatry (Psychology).

LAWRENCE C. MCHENRY, JR., B.A., M.D., Instructor in Neurology (effective 10/1/64).

ROSS B. MOQUIN, B.S., M.D., Instructor in Medicine.

SUNIL K. NIYOGI, B.S., Ph.D., Instructor in Pharmacology (effective 12/16/63).

KAREN J. OTT, A.B., M.S., Ph.D., Instructor in Microbiology (effective 9/15/64).

PETER W. REED, B.A., M.D., Instructor in Radiology.

LEONARD SATTEL, M.D., Instructor in Psychiatry.

JOSEPH J. SCARANO, B.S., M.D., Instructor in Pathology.

HENRY E. SEIDEL, A.B., M.D., Instructor in Pathology.

YONG JUN SHIN, B.S., Instructor in Radiology (Radiation Physics).

BERNARD J. SHUMAN, A.B., M.D., Instructor in Psychiatry.

MARY L. SOENTGEN, B.A., M.D., Instructor in Pediatrics.

THEODORE NEAL TAUSIG, A.A., M.D., Instructor in Psychiatry.

ANTHONY J. TRIOLO, B.S., M.S., Ph.D., Instructor in Pharmacology (effective 6/1/64).

CHARLES M. TUCKER, B.S.Ed., M.Ed., Ph.D., Instructor in Psychiatry (Psychology) and Instructor in Pediatrics (Psychology) (effective 1/28/64).

NORMAN D. WEINER, B.S., M.D., Instructor in Psychiatry.

LESLIE WIENER, B.S., M.D., Instructor in Medicine.

FREERK W. WOUTERS, B.S., M.D., Instructor in Psychiatry.

ROHLO A. ARDIZONE, A.B., M.D., Assistant in Surgery (Plastic).

JEAN ATWATER, B.S., Assistant in Medicine.

WILLIAM D. BONATTI, B.S., M.D., Assistant in Ophthalmology.

RICHARD A. CAUTILLI, B.S., M.D., Assistant in Orthopedic Surgery.

ALLEN E. CHANDLER, B.S., M.D., Assistant in Pediatrics (effective 7/1/64).

DOROTHEA D. GLASS, B.A., M.D., Assistant in Medicine (Physical Medicine and Rehabilitation).

STEVEN R. HOMEL, B.A., M.D., Assistant in Pediatrics (effective 9/1/64).

SA KANG HONG, M.D., Assistant in Anesthesiology (effective 7/1/64).

EDWARD A. JAEGER, A.B., M.D., Assistant in Ophthalmology.

JANE E. KIRK, Assistant in Medicine.

ROBERT J. KIRSCHNER, B.S., M.D., Assistant in Ophthalmology (effective 9/30/63).

ESTHER G. LEIPHEIMER, B.A., Assistant in Obstetrics and Gynecology (Social Service).

HARVEY M. LEVIN, B.S., M.D., Assistant in Obstetrics and Gynecology (effective 7/1/64).

JAMES HOWE LOUCKS, B.S., M.D., Assistant in Medicine.

JOHN T. MAGEE, B.A., M.D., Assistant in Medicine.

HELEN L. MALIS, B.A., M.D., Assistant in Pediatrics.

DIVO A. MESSORI, B.S., M.D., Assistant in Medicine.

AUSTIN P. MURRAY, A.B., M.D., Assistant in Ophthalmology (effective 9/30/63).

AARON N. NEWBERG, A.B., M.D., Assistant in Pediatrics (Effective 9/1/64).

CHARLES L. REESE, III, A.B., M.D., Assistant in Neurology.

JOSEPH A. RIGGS, B.S., M.D., Assistant in Obstetrics and Gynecology (effective 7/1/64).

MARCEL P. SANCHEZ, M.D., Assistant in Pediatrics (effective 7/1/64).

NICOLETTE SOLARI, B.S., M.S., Assistant in Pediatrics (Social Service).

WILLIAM STEPANSKY, B.S., M.D., Assistant in Medicine.

RONALD E. TRAUM, A.B., M.D., Assistant in Obstetrics and Gynecology (effective 7/1/64).

ANNE W. WEBB, A.B., M.S., Assistant in Pediatrics (Social Service).

JOE ED WHETSELL, M.D., Assistant in Medicine.

NATHAN ZANKMAN, A.B., M.D., Assistant in Pediatrics (effective 7/1/64).

GAIL AUGUST, A.B., A.M., Research Fellow in Psychiatry (Psychology).

SYED IQBALUL HASAN, B.S., Research Fellow in Microbiology.

MERCEDES S. PEREZ-TAMAYO, B.S., Research Fellow in Radiology (Radiation Therapy).

BORIS TEMMER, M.D., Research Fellow in Radiology.

KOICHI TOKUNAGA, M.B., M.D., Research Fellow in Surgery (effective 7/1/64).

VIMONVAN VIPATAPATYA, M.D., Research Fellow in Obstetrics and Gynecology.

CONSTANCE BIDDLE, B.A., M.B., Teaching Fellow in Physiology (effective 10/15/63).

ALI S. EMRANI, M.D., Nathan Lewis Hatfield Fellow in Urology (1964-1965).

ZALMON POBER, B.S., Teaching Fellow in Physiology (effective 10/15/63).

ROBERT G. STOCKMAL, B.S., Teaching Fellow in Microbiology.

REAPPOINTMENT

EFTYCHIA C. ARAMPATZI, M.D., Research Fellow in Obstetrics and Gynecology (effective 7/1/64).

Jefferson in Puerto Rico

*by Gonzalo E. Aponte, M.D., Class of 1952
and Associate Professor of Pathology*

SINCE the practice of medicine in Puerto Rico is a mirror of American medical practice, it reflects well the splendid contribution Jefferson has made to the latter. A total of 65 Puerto Ricans have received their medical degrees at Jefferson, the first one in 1874. Three others are presently medical students and one of them, Miss Isabel Saldaña ('67), is the first Puerto Rican woman to study medicine at Jefferson. Forty-eight of these graduates are living, and 35 of them reside in the island. The formation of a medical school by the University of Puerto Rico has reduced the number of college graduates who leave the island to study medicine. There were no Puerto Ricans in the graduating classes of 1957 to 1960, the longest period of time since 1904 during which none graduated from Jefferson. This decrease has been noted mainly in the number of applications from students who study college at the University of Puerto Rico. During the years 1921 to 1951, 61 per cent of the Puerto Ricans who graduated from Jefferson attended college in the island; whereas 64 per cent of those who have entered Jefferson since 1952 graduated from American colleges. Many different schools are represented in the list of Puerto Rican alumni who attended American colleges. Since 1921, a total of 16 alumni have graduated from 14 different colleges—two

from Georgetown, two from Franklin and Marshall, and one each from Loyola (Chicago), George Washington, Penn State, Dickinson, Catholic U., Baylor, Villanova, U. Richmond, Ursinus, Amherst, Mt. St. Mary's (Md.), and Yale. The three Puerto Ricans who are now medical students at Jefferson attended Georgetown University, Goucher College and Dartmouth College. Many other Puerto Rican physicians, graduates of other medical schools, have taken their internships, residencies or fellowships at Jefferson. Their names are not included here because the list we have is not complete.

Six alumni have sons who also graduated from Jefferson—1) Dr. Enrique G. Matta ('12) and son Enrique L. ('40); 2) Dr. Nicolás Sanabria ('12) and sons Arturo ('52) and John ('52); 3) Dr. Armando García-Soltero ('16) and son Armando ('43); 4) Dr. Calixto Rodríguez ('17) and sons Roberto ('48) and Héctor ('49); 5) Dr. Mario Fernández ('24) and son Manuel ('53); and 6) Dr. Antonio Ramos-Oller ('36) whose son Antonio is in the Senior Class. Another group of brothers also graduated from Jefferson—Dr. Frank Veve ('42) and his brother Juan ('49).

The above map shows the location of Jefferson graduates in Puerto Rico.

The types of medical practice of the living alumni are listed below. Although more physicians are engaged in general practice than in any single specialty, many kinds of specialization are represented. Jefferson became known in Puerto Rico during the first two decades of this century through the competence of the early alumni, family doctors whose dedication and integrity earned for them prestige and the admiration of all. They set the example and were the mold in which the subsequent alumni were cast. The latter, in maintaining these high standards, have brought additional honor to their Alma Mater. Their professional activities extend beyond their private medical practices to include teaching, research, public health, administration and the multiple socio-economic problems of the community. Jefferson has done well for them and they have done well for Jefferson.

1874 Antonio Goicuría*

1882 Augustín J. Herrero*

1904 José S. Belaval*

1906 Pablo M. Bonelli, the oldest living graduate, is now retired from medical practice.

1907 José González*

1911 Arturo Carbonell*

1912 Enrique G. Matta has been retired since 1944. He has written a book, *The Americano*, which deals with the conflicts between the Spanish and American legal systems in Puerto Rico early in the century. He maintains his good spirits despite illness.

Nicolás Sanabria is semi-retired and lives in San Germán.

1913 Hiram González y Rosario*

1914 Alfonso M. Padilla*

1915 Leandro López de la Rosa*

1916 Edgardo Quiñones practices general Medicine and Surgery in San Germán.

- 1916 Armando García-Soltero is semi-retired and lives in Guayama.
Ramón Ramírez-Santibañez*
- 1917 Calixto Rodríguez has been ill but continues as Director of the Hospital de Damas in Ponce.
Hilario B. Caso*
- 1918 Juan C. Rodríguez practices general Surgery in Bayamón.
Jenaro Barreras practices general Surgery in Caguas.
Pedro Juan Carreras*
- 1919 Jorge Aguilú*
Vicente Font-Suárez practices general Medicine in Santurce.
Agustín Mujica-Dueño*
- 1920 César Domínguez-Conde practices Pediatrics in Humacao.
Antonio Navas, despite illness, continues an active practice in Ophthalmology in Santurce.
Julio Palmieri, who practices general Medicine in the Seín Clinic of Santurce, has been a frequent participant in alumni affairs in the island.
Carlos A. Pons†¹ was Pathologist at Fitkin Memorial Hospital in Neptune, N. J., but resigned about five years ago following a severe attack of hepatitis. He is now well and is engaged in the private practice of Pathology in Asbury Park, N. J.
- 1921 José Rodríguez-Pastor, retired from medical practice, is busy fomenting the Club de Oro, an organization which aims at the protection and welfare of the aged.
Manuel María Maeso*
- 1924 Mario C. Fernández practices Psychiatry in Santurce.
José Antonio Dávila*
Miguel Evaristo Sala*
- 1927 William R. Gelpí, well known general practitioner from Ponce, visits Jefferson not infrequently and has referred many of his patients here.
Enrique Koppisch*, redoubtable Pathologist who died in 1961, was a director of the School of Tropical Medicine in Puerto Rico and later Head of the Pathology Department in the Medical School. A biographic note on Dr. Koppisch appeared in the December 1961 issue of the BULLETIN.
- 1928 Juan A. Pons was for several years Commissioner of Public Health in San Juan. Following his tenure in office he studied Geriatrics at Duke University. Shortly after his return to the island he suffered a coronary occlusion but has long since recovered and is now actively engaged in the practice of his specialty.
- 1929 Manuel García-Estrada, whose medical interest is Preventive Medicine, specializes in occupational diseases and works with the government in this capacity.
- 1931 Andrés Gilberto Oliver†², a member of the U.S. Air Force and specialist in Preventive Medicine and aviation medicine, practices at the Maxwell Air Force Base in Alabama.
- 1934 Manuel de Diego†³ practices Orthopedic Surgery in Binghamton, N. Y.
- 1936 Antonio Ramos-Oller, who for years practiced general Medicine and Surgery, now dedicates about 75 per cent of his time to the practice of Pediatric Surgery. He took specialty training in Boston.
- 1938 José R. González-Flores, an Internist whose chief interest is cardiovascular diseases, practices in Ponce.
- 1940 Enrique L. Matta, Jr.†⁴ is in the Department of Public Health in Miami, Florida.
- 1941 Manuel G. Carmona†⁵ practices General Surgery in Hollywood, Florida.
- 1942 Frank Veve is busy in the practice of general Medicine and Obstetrics and Gynecology. His oldest son studies engineering at Penn State. Dr. Veve is Secretary of the Puerto Rico Alumni Chapter.
- 1943 Armando R. García-Castillo practices Obstetrics and Gynecology in Santurce. He attended the Jefferson Alumni Seminar in Madrid in 1963.
- 1944 Manuel Enrique Carrera†⁶ lives in Cheltenham, Pa., and practices general Medicine and Surgery.
Agustín M. de Andino, a successful Internist with special interest in endocrinology and metabolic diseases, has a very busy private practice and also teaches at the medical school. Dr. de Andino took his residency training at Jefferson.

- Emilio F. Trilla, Dermatologist and faithful Jefferson alumnus, lives in Carolina, P.R.
- 1945 José Luis García-Oller†⁷ practices Neurosurgery in New Orleans.
- 1948 Roberto C. Rodríguez, Internist, practices in Santurce and is Assistant Professor of Medicine in the medical school.
- 1949 Juan Eduardo Veve practices general Medicine and Pediatrics in Fajardo and is Vice President of the Puerto Rico Alumni Chapter. He visited Jefferson during Alumni reunion week last June.
- Hector F. Rodríguez, Internist, is Chief of Medicine at the Ponce City Hospital.
- 1950 Erich A. Everts-Suárez†⁸ is Director of Laboratories at St. Mary's Hospital in Philadelphia and Assistant Professor of Pathology at Jefferson, where he took his residency training.
- José R. Limeres†⁹, who returned to Puerto Rico after his graduation, came back to the States later and now practices general Surgery in New Jersey.
- 1951 Simón Piovanetti is kept very busy in the practice of Pediatrics in Santurce. He took residency training at Jefferson.
- ✓ Luis Pío Sánchez-Longo is Professor of Neurology at the University of Puerto Rico School of Medicine, where he carries on investigative work on epilepsy. He is President of the Puerto Rico Alumni Chapter.
- 1952 José H. Amadeo is a very successful Chief of Surgery at the Veterans Administration Hospital in San Juan. He completed his residency training at Jefferson in 1957 and then spent two years with the U.S. Air Force in Alaska.
- Gonzalo E. Aponte†¹⁰ is Associate Professor of Pathology, Markle Scholar in Medical Science and Coordinator of Oncologic Teaching at Jefferson. He is also Research Collaborator at Brookhaven National Laboratory in Long Island.
- Arturo E. Sanabria, who resigned his post as Medical Director of Ciales Municipal Hospital last March, is now in general practice.
- John F. Sanabria practices general Surgery in Santurce and teaches at the medical school.
- 1953 Manuel Fernández†¹¹ practices Obstetrics and Gynecology in Hialeah, Florida.

Gerhard Fromm†¹² was born in Germany, but went to Puerto Rico as a boy and graduated from college there. He spent a year as NIH Fellow in Neurophysiology at the University of Freiburg, Germany, and is now in the Neurophysiology Department at Tulane.

- 1954 Cesar Colón-Bonet†¹³ is now associated in the private practice of Internal Medicine with the offices of Vant Hof, Yost and Vroon in Grand Rapids, Michigan.
- 1956 Antonio Ramos-Barroso has a very busy practice of general Medicine and Surgery in Bayamón and Santurce. His cousin, Antonio, is now a senior medical student at Jefferson.
- 1961 Enrique M. Vassallo is now with the U.S. Army in Korea. He plans to take a residency in Psychiatry in the United States after the termination of his tour of duty.
- 1963 Luis Santaella interned at the University Hospital in Puerto Rico and has started a residency in Pathology at the medical school there.
- Fernando Santiago-Rivera has completed his internship at San Juan City Hospital.
- 1965 Antonio Ramos-Umpierre, senior student at Jefferson.
- 1967 Isabel C. Saldaña, sophomore student at Jefferson.
- 1968 Andrés Mario Salazar, freshman student at Jefferson.

*Deceased

†Not residents of Puerto Rico—1) Asbury Park, N. J.; 2) Maxwell Air Force Base, Alabama; 3) Binghamton, N. Y.; 4) Miami, Fla.; 5) Hollywood, Fla.; 6) Cheltenham, Pa.; 7) New Orleans, La.; 8) Riverton, N. J.; 9) Union, N. J.; 10) Philadelphia, Pa.; 11) Hialeah, Fla.; 12) New Orleans, La.; 13) Grand Rapids, Mich.

The following Jefferson alumni born in the United States now practice medicine in Puerto Rico:

- 1) Dr. John L. Simon, 1940—Neurology
- 2) Dr. Stanley Stauffer, 1953—Anesthesiology
- 3) Dr. Robert C. Bastian, 1957—Internal Medicine (U.S. Army)

Solomon Solis-Cohen, Doctor and Poet

The following article was written by Dr. Edward C. Britt, Class of 1933. It is the story of a man who blended the teachings of Hippocrates with the art of the Muses.

This Thomas Eakins, portrait of Dr. William Smith Forbes, who taught Anatomy at Jefferson from 1879 to 1905, also depicts Dr. Solis-Cohen (first row—second from right, also see detail at left) while a student at Jefferson.

SPIRITUALITY is a noun defined as pertaining to the mind or spirit, as distinguished from matter, or pertaining to the soul or higher nature of man. Spiritual then, indeed, is the mood that suffuses the mere matter, the bricks and mortar that constitute the Jefferson Medical College. At night, especially, as she stands silently, softly breathing, one senses her in contemplation of an historic past, musing upon a vigorous present, visualizing a greater future. Non-profit, non-sectarian, her only "Raison D'Etre" the production of Medical Doctors, of whom long ago Homer said "A physician is worth many other men." Looking upward one is awed that relatively so small an institution could exert so world wide an influence.

Perhaps it is an awe engendered by thoughts of those historic figures delivered from the womb of their Alma Mater, Samuel D. Gross, S. Weir Mitchell, W. W. Keen, J. Marion Sims, Carlos Juan Finlay, Thomas Addis

Emmet, ad infinitum and indicative of her continuing fertility and ability to produce greatness, John H. Gibbon, Jr.

Perhaps she stands in the darkness as a fostering Mother, meditating upon her great sons' importance in the founding of nine medical schools among whom were Levi Cooper Lane and Richard Beverly Cole of the Universities of Stanford and California, respectively, and other distinguished offspring, who make her content to bathe in the reflected glory of their own great achievements.

Perhaps she is looking down upon the one hundred and forty years of her countless, unheralded but heroic sons, in hamlets throughout the world who "Cure sometimes, relieve often, and comfort always" (Hobart Amory Hare).

Perhaps these are the things that inspire her Alumni body to make it the country's most loyal, which in re-

cent homage to two of its own, bestowed its annual achievement award upon Louis H. Clerf, distinguished emeritus professor of Broncho-Esophagology and Henry L. Bockus, world renowned Gastroenterologist. The latter, upon accepting the award said "Of all the honors I have received, this one I covet the most, from my first love, my Alma Mater."

Reflecting upon these thoughts and events it is not without wonder that so many Alumni are so dedicated and equally as moving is the same devotion found in so many of Jefferson's great adopted sons, Thomas McCrae, whose brother John composed "In Flanders Fields", the late Martin E. Rehfuess and J. Parsons Schaeffer, to mention a few. Sons who not only fell under the spell of our Alma Mater but infused a new loyalty and spirituality into it.

the adopted and the actual

Beautifully and uniquely illustrative of the crystallization of the loyalty and spirituality of the adopted and the actual Alumnus were the brothers Solis-Cohen—Dr. Jacob Da Silva (1838-1927) M.D. 1860, the University of Pennsylvania, pioneer Laryngologist, "The Nestor of American Laryngology", military surgeon and until the time of his death active in the affairs of the Jefferson Alumni Association; and, the subject of this article, Dr. Solomon (1857-1948) M.D. 1883, the Jefferson Medical College.

Solomon Solis-Cohen, M.D., Sc.D., D.H.L., physician, poet, scholar, scientist, who made original contributions in each field and who "Represented the Confluence of his ancestry," was born in Philadelphia on September 1, 1857, a descendent of a colonial pre-revolutionary family. A remnant of a letter written by his grandfather, Mr. David Hays, in which can be made out the words "When the enemy came to Bedford and burned my house on July 2nd, 1778" refers to a Revolutionary War incident in which the Hays home in Bedford, Westchester County, New York, was destroyed by the Tories and the British under Lieutenant Colonel Tarleton. One week later they set fire to the entire village. Doctor Solomon Solis-Cohen received his B.S. from the Central High School here and his M.A. five years later. Upon graduation, at the age of fifteen, he delivered the honor essay "The Study of the Physical Sciences" at Central's 68th semi-annual commencement held on July 3rd, 1872. "It was somewhat ponderous," he recalled at the age of eighty-two. He took up bookkeeping for the next eight years but becoming disenchanted with debits and credits he rejected this discipline and thereafter never kept any

accounts. "I decided that I'd get along better in medicine. My brother Jacob, twenty years my senior, who had served in the Civil War (winning three decorations for valor and fifty years later, the Congressional Medal of Honor, ed.) was a noted laryngologist. I asked him for a chance. In those days a medical student started with practice not theory. He entered a Doctor's office, went to the hospital with him and learned first hand."

He began his medical career in 1884 as Chief Clinical Assistant to the Out-Patient Department of Jefferson Hospital. His first appointment to the faculty was in 1885 as lecturer on special therapeutics. In 1888 he was made clinical lecturer on medicine, in 1902 assistant professor of clinical medicine and from 1904 to 1927, professor of clinical medicine, becoming emeritus professor in 1927.

Dr. Solis-Cohen was a prodigious worker and a prolific writer and while these dates represent forty-three years of devotion to his profession they by no means encompass his medical accomplishments, nor do they give any insight into the spiritual nature of this great man which ran concurrently and as an integral part of his scientific achievements. While describing vasomotor ataxia for example, he was at the same time capable of composing "For I Know That My Redeemer Liveth", "O Love, I Cried, Thou Saidst Thy Path Was Strewn With Roses", "Love Called Me Not Away" and the charming "Soft White Hands That Touch My Cheek". This latter poem referred to his son, D. Hays Solis-Cohen, *aetate* eleven months. A distinguished son of a distinguished father, Mr. Solis-Cohen is now a Philadelphia lawyer and a member of the board of trustees of the Jefferson Medical College.

So many and varied were Dr. Solis-Cohen's activities that it is impossible to list all of them here. A bibliography of his writings and addresses consisting of eighty-four pages of fine print, emphasizes this difficulty. This was the last work of the late Edward D. Coleman who held this effort close to his heart. A great admirer of Dr. Solis-Cohen he considered this arduous compilation a labor of love.

highlights of his career

Nevertheless a résumé of his career, by Dr. Augustus A. Eshner, touching upon some of its highlights, is herewith presented.

In addition to his forty-three years at Jefferson he was Professor of Clinical Medicine and Therapeutics at the Philadelphia Polyclinic and Graduates in Medicine and physician to its Hospital from 1887 to 1902. He was

lecturer on Therapeutics at the Medical School of Dartmouth College from 1890 to 1893; physician to the Philadelphia General and Jewish Hospitals from 1887 to 1927, and thereafter consulting physician; physician to the Rush Hospital from 1890 to 1920; and consulting Laryngologist to the Pennsylvania Institution for the Feeble-Minded at Elwyn, 1894-1895.

He also served as consulting physician to the Pennsylvania State Hospital for the Insane at Norristown from 1900 to 1924. He was a member of the Board of Managers of the Municipal League of Philadelphia from 1893 to 1896. He was one of the founders of the National Tuberculosis Association in 1904. He was a trustee of the United States Pharmacopeial Convention from 1920 to 1940. He was a member of the Philadelphia Board of Education from 1925 to 1943, and to the deliberations and activities of this body he made wise and constructive contributions. His memory is perpetuated in the Solomon Solis-Cohen Elementary Public School. He served as Director of the School of Design for Women from 1927 to 1930.

Dr. Cohen was a member of many and varied learned, cultural and scientific organizations at home and abroad, and he held official positions in a number. He was President of the Philadelphia County Medical Society in 1898 and 1899, and became a Fellow of the College of Physicians in 1888. He was awarded the Honorary Degree of Doctor of Hebrew Literature by the Jewish Theological Seminary of America in 1926, the Honorary Degree of Doctor of Science by Jefferson Medical College in 1933, and the same Degree by the Philadelphia College of Pharmacy and Science in 1939.

vasomotor ataxia

S. Solis-Cohen was the first to recognize in 1885 the interrelationship of the group of disorders which he named vasomotor ataxia or autonomic imbalance. In 1892, he gave a description of that condition, the first in medical literature. Vasomotor ataxia is a form of autonomic ataxia causing irregularities in the peripheral circulation marked by alterations of the powers of vasoconstriction and vasodilation of the smaller blood vessels, or a lack of co-ordination between the sympathetic and parasympathetic nervous system.

He showed that it underlied many puzzling disorders previously attributed to "Idiosyncrasies" including hay fever, eczema, asthma, hives, and Graves Disease. He pointed out the connection of autonomic disturbances with disturbed functions of the glands of internal secretion and the dependence of its various groups on special

excitants, a phenomenon since termed "Allergic Reaction."

He advocated hydrotherapy in the treatment of typhoid fever as well as hydrotherapy in general. These and kindred methods, electrotherapy, pneumotherapy, climatotherapy, serotherapy, radiography, suggestion and mental therapy, together with hygienic and preventative measures formed the themes of his "System of Physiologic Therapeutics" 1900-1905 in eleven volumes. He was one of the first to use endocrines as medicaments. Thus the use of adrenal and pituitary products in asthma, hay fever, hives, and like disturbances was first advocated by him. His pharmacotherapeutics (co-author), a 2,000 page treatise, contains in addition to a thorough exposition of the principles of medicine, a full discussion of the history, properties and uses of virtually all drugs of proved worth.

poet and translator

Dr. Solis-Cohen was an ardent student of Hebrew and was taught by masters of this ancient language. He translated the works of medieval poets and his translation of the poems of Moses Ibn Ezra, Hebrew medieval poet of Spain, is famous among scholars. Other translations of ancient Hebrew poems into English revived masterpieces of Jewish culture that otherwise may have been lost.

Poetry was his hobby. "But I wasn't a very good poet," he said, "I only rhymed when I felt like it." This statement is characteristic of the humility of the man. His poem "When Love Passed By" originally appeared in Scribner's magazine in 1888, then in literally hundreds of other publications and was translated into 23 foreign languages. One of his poems, the famous "For I Know My Redeemer Liveth," was reprinted by John Greenleaf Whittier in his anthology *Songs of Three Centuries*.

A collection of his poems and other verses, including translations from Hebrew poets of the Middle Ages, was published under the title of "When Love Passed By," in 1929. This includes among other poems already mentioned, "In Her Eyes," "Love is the Best of Life" and the beautiful "Wake My Darling From Thy Slumbers."

A collection of his writings under the title *Judaism and Science and Other Addresses* was privately printed in 1940 by Mr. A. S. W. Rosenbach, famous collector of rare books and manuscripts and published by his friends in honor of his eighty-second birthday, September 1, 1939.

The articles therein range from the title piece "Judaism and Science" to "Franklin, the Philadelphian" and

"Washington's Death and the Doctors." The entire work consists of two-hundred and seventy-four pages.

there is no conflict

He dealt with the alleged conflict between science and religion. "There is no conflict" he contended. He studied Darwin, Huxley, Spencer and other evolutionists and pointed out that a belief in a creative diety was not inconsistent with science. He felt that science conflicted only with dogmatic theology for which he had no taste. "Out of the Beast Have We Risen; But Mark, We Have Risen." (s.s.-c)

In national politics he fought the demand for an imperialist policy for the United States and defended freedom for the Philippines. "A good deal of the diplomacy of today can be described," he said "in Napoleon's words 'Those lies agreed upon'." In local politics he joined reform movements and battled the organization. In economics he wrote and argued in favor of the single tax theory of Henry George. "If George's doctrines were put into effect there would be no need for a so-called planned economy."

He was skeptical of the agitation for socialized medicine. He said, "Anything that would bring scientific medicine under government control or that would make the government the dictator of medical practice, would be a great misfortune to science, the physician and the country at large."

At eighty-two he was hesitant about how to reach this age. "I'm afraid my long life came about through violating all the rules I laid down for others. I have always believed in moderation even in following rules."

During his medical career he had as patients, Ramsay MacDonald, ex-Prime Minister of England, Paul Du Chaillu, African explorer and Reginald Wright Kauffman, novelist. The latter two men dedicated books to him.

paying his debt

At the age of eighty-two he became restricted to office work and consultations. He wanted to conserve his energy for his work as a member of the Board of Education. "By continuing as a member of the Board I'm trying to pay my debt for my education in Philadelphia public schools." As a member of the Board (1925-1943) he was influential in the adoption of Diphtheria immunization in the public schools. As President of the Phila-

delphia County Medical Society (1898 and 1899) he was instrumental in introducing effective filtration in the Philadelphia water supply, thus markedly reducing the incidence of typhoid fever.

There were many things he would have enjoyed during his life but he couldn't find time for them. "One must accept life as it comes. Naturally every man thinks of projects he would like to carry out. He gets wonderful ideas but there isn't time to do anything about them and they vanish. I have no especial plans for the future (he was then eighty-two). I haven't set any age I'd like to attain. I live in the day and look forward to the future calmly." Dr. S. Solis-Cohen died on July 12th, 1948, at the age of ninety, of Parkinsonism and Bronchopneumonia.

Dr. Augustus A. Eshner, a colleague of Dr. Solis-Cohen and fellow Jeffersonian, class of 1888, has written the following beautiful memorial to him.

a poet of charm

"He was a poet of charm and grace, with a strength of beauty and imagery and expression. His verse has found a permanent place in literature.

"Dr. Cohen's artistic faculty found outlet in work in pastel and in painting in oil at a period when relaxation of the pressure from professional obligations permitted its exercise.

"The declining years of his life were clouded by a cruel and progressive malady that brought physical disability, without obscuring the native clarity of his mind or repressing the vital buoyancy of his spirit.

"Dr. Cohen was an ornament to his profession and a pillar of strength in the divers fields in which he exercised his talents. He was a keen and critical observer of clinical phenomena, an acute and discerning diagnostician, a sympathetic and helpful consultant and a resourceful therapist of wide horizon. He was a persuasive and convincing teacher, who kept fully abreast of the advances in his field of activity and maintained a lively interest in his students.

"He was to many, equally of low degree as of high estate, the beloved physician. A beacon of cheer and of hope, a token and a symbol of escape and recovery, a bulwark of defense in the face of sickness and adversity.

"Dr. Cohen was a man of exalted intellectual caliber and stature, both quantitatively and qualitatively, and he exerted an elevating and forward looking influence in the spheres of activity in which he participated. He was possessed of strong convictions and fortified with the

courage to stoutly proclaim and defend them.

"He had a passion for precision and truth and for justice and right, in practice and in principle. He was eloquent and forceful in the written and in the spoken word and his diction attained a high degree of perfection. He had a profound interest and at times took an active part in civic and communal affairs and always on the side of progress and reform.

"Dr. Cohen represented the confluence of his ancestry. To his descendants he has transmitted the custody of a precious heritage tenderly to be cherished."

In addition to the detail from Thomas Eakins shown herein there is a portrait of the distinguished Doctor in McClellan Hall, presented to Jefferson by his friends in 1929. It was painted by Maurice Molarsky.

Dr. Leon Solis-Cohen, a Jefferson alumnus, class of 1912, has graciously provided, together with many of

the works from which this material was taken, a poem of his father's, dictated a few days before his death:

THROUGH THE SHADE

Why dost thou tremble and shudder
My soul, shrinking back as in fear?
Danger nor toil hath appalled thee
In all the long journey till here.
Let not thy courage forsake thee,
O soul, now the end draws near.

O Body—the shadow, the valley!
My soul, keep thy path undismayed;
'Tis the hillslope of Life casts the shadow—
And there shall my footsteps be stayed;
But beyond, shines for thee Light Eternal—
O soul, to the Light through the shade.

HIGH SCHOOL STUDENTS PARTICIPATE IN SECOND BIO-SCIENCE PROGRAM

AT the request of Mr. Allen Platt, co-ordinator of science teaching of the Philadelphia Board of Education, the Physiology Department during the summers of 1963 and 1964 conducted ten-week programs of laboratory work in biomedical science for the high school student.

The purpose of the program was to provide educational stimulation and experience for outstanding students by means of direct contact with investigators. Increased co-operation between the nation's colleges and the high schools in arranging science education curricula have enabled colleges to early recognize students with high scholastic potential. Such programs are well within the abilities of the student, even when they are of quite advanced nature, and serve to channel the students into areas of interest with which they come to identify themselves.

Both summers, twelve students from the 11th and 12th grades were selected by the science teachers of

their respective high schools. Selection was made from the top students in each class. Participating were students representing most of the high schools in Philadelphia, as well as several in the suburbs and New Jersey. (Each student, incidentally, was covered by an accident insurance policy in the amount of \$1000 at a premium of \$2.00 per student.)

The high school students were distributed among staff members to form teams. Each team consisted of a staff member, a Ph.D. graduate student and/or a medical student, a college pre-medical student, and one or two high school students. The high school students learned the literature background, the purpose of each experiment, and technical details of the operative procedures. Each became quite proficient in the handling of animals and the use of equipment. The high school student came to be a junior member of the research project team and did not consider his duties to be merely technical.

At the close of each session, the students have written

reports on the particular areas explored. They presented topics such as "The Use of Monomer 'Glue' in Surgery" (Michael Cohen, Cherry Hill High School, 1963), "Local Anesthetics and Visceral Functions" (Joseph Harabin, Central High School, 1963), "The Effect of Tissue Extracts on the Healing of Stomach Wounds" (Hal Beilan, Central High School, 1964) and "Vagal Response in Dogs" (Madeline Staller, Girls High School, 1964).

Except for the extent of their knowledge, the high school students conducted their assignments as well as did most of the medical students. A high level of enthusiasm was maintained by the high school students throughout the 10-week period. No student was ever absent or tardy, and the staff was gratified by the maturity shown by the students.

Expressing his approval on behalf of the Board of Education, Mr. Platt said that "... the enthusiastic comments made by the students are a tribute to the excellence of the program." For a student at the Benjamin Franklin High School and two-year participator, the Jefferson program was a stimulation for his career goal. He said, "The program increased my desire to do well in school, so that I can go into the field of my choice." According to Charles Dorfman from Cheltenham High School, "The Jefferson Bio-Science program had two very important characteristics that made it worth while. . . . These were the independence and responsibility which were allowed. With these, you could work pretty much on your own and become involved in what you're doing."

It is expected that the High School student program will be continued and expanded next year. "To be able to co-operate with you for a long time to come," is the hope expressed to Jefferson by the Board of Education.

Progress Report

Alumni Division Realizes 59% of its Goal

CONGRATULATIONS to the first thousand who have contributed or pledged or indicated that they would contribute a total of \$513,452.00 to the Alumni Division of the Building Fund Drive! Included in this total is a generous gift of \$25,000.00 by Mrs. Jerome Louchheim in honor of George Willauer, M.D., one of your Associate National Chairmen in this Building Fund Drive. If we add to this half a million dollars, the amount contributed by the Alumni on the Faculty, the grand total amounts to almost three quarters of a million dollars. More exactly, this grand total rounded out to the nearest thousand amounts to \$745,000.00. This represents 59 per cent of our \$1,250,000.00 goal. I think we should all be very proud of this record of the help that the Alumni are extending to their Alma Mater to help build a magnificent new school and campus. I believe we should be especially proud because 1) the campaign was very brief; 2) the Annual Alumni Giving was not interfered with and 3) these contributions were made in spite of heavy pressure to support local hospitals and charities.

Only a few specially selected Alumni, many of them serving as Area Chairmen, were approached during the first three months of our Drive from the middle of December 1963 to the middle of March 1964, at which time the first phase of our Drive was completed. Letters were then mailed during the last week in March to the Alumni who had not yet been approached. On May 20, 1964, a follow-up letter was then sent to the Alumni who had not yet contributed. Finally, during the last three months many Area Chairmen did a magnificent job in approaching those Alumni in their immediate areas who have not yet contributed. Thus, in a brief period of nine months, we have raised over half a million dollars. Actually, the vast majority of you first heard of the Building Fund Drive only about six months ago on April 1, 1964. To achieve what we have in this length of time I regard as a magnificent accomplishment.

I am proud that we have accomplished what we have during this period of solicitation for the 16th Annual Alumni Giving. This 16th Annual Alumni Giving totaled in round figures \$177,000.00, which is the largest amount ever raised at Jefferson in an Annual Alumni Giving Drive, and amounts to over 50 per cent more than it was five years ago. Some 3,500 of you contributed to this magnificent Alumni Giving and many of you may well have been confused by the second appeal for the Building Fund Drive. Nevertheless, a thousand of you responded generously, for which I extend my earnest thanks and congratulations.

Finally, this laudable response was made in spite of the pressure from local charitable organizations and local hospital drives, to which no practicing physician can avoid contributing. For these three reasons especially, I take my hat off to this first thousand.

Plans for the Future

Now what are the plans for the future? We are about half a million dollars short of our goal, and several thousand Alumni short of contributors. In view of the brevity of the drive (for most Alumni it was two months, April 1 to June 1, 1964), the National Co-Chairmen, the Campaign Committee and I requested an extension of the time from Mr. Sienkiewicz, the General Chairman of the Building Fund Drive. Mr. Sienkiewicz was agreeable to this. We plan, therefore, to send a letter to all Alumni reporting on the progress of the Building Fund Drive, thanking those first thousand for their contributions and asking a few more thousand to contribute so that we can go over the top. After all, since 3,500 Alumni contributed to the last Annual Alumni Giving Drive, should we not expect at least another 2,500 Alumni to give to the Building Fund Drive for a greater Jefferson?

Mr. D. Hay Solis-Cohen, member of the Board of Trustees, studies plans for the auditorium to be named in his honor in the new Basic Science—Student Commons Building. Mr. Gustave G. Amsterdam (left), member of the Board, is Chairman of the Solis-Cohen testimonial group which donated more than \$100,000 to Jefferson for this project. Mr. Bodine is shown at right.

I might remind you that this is the first time in over 50 years that Alumni have been asked to contribute to a Building Fund Drive. I might also emphasize that this is a capital gifts campaign. The most inexpensive way of making a capital gift is to give stocks which have appreciated over the years, and on which you would have to pay a capital gains tax if the securities were sold. In transferring such stocks which have appreciated in

value to Jefferson, it is possible to deduct the market value of the security as a charitable gift on your income tax. Furthermore, no capital gains tax need be paid.

I look forward to a successful windup of our campaign with gifts from at least 2,000 more Alumni, gifts for a greater Jefferson.

JOHN H. GIBBON, JR., M.D.
National Chairman, Alumni Division

Hare Society Enters 74th Year

“DR. Hare’s career demonstrated the inestimable value of laboratory training, research and the spirit of research in laying the foundation for a teacher of the art and science of medicine, for a sound practitioner, and for a safe and well-informed consultant. To all these tasks, faithfully performed, he lent a new vitality. He believed thoroughly in his mission: to train medical students for their careers to be devoted to the relief of human suffering and the prolongation of human life. His own life he lived abundantly; he gave richly of the best that was in him. He set his distinctive

mark upon our science,” commented the distinguished American Ophthalmologist Dr. G. E. DeSchweinitz on learning of the death of his close friend Dr. Hobart Amory Hare on June 15, 1931.

Dr. Hare’s greatness was paid many tributes during his lifetime not the least of which was the formation of the first continuing undergraduate student organization in the history of Jefferson—The Hare Honor Medical Society—founded in 1891 as The Hobart Amory Hare Honor Medical Society in honor of Dr. Hare, then Professor of Medicine.

To be accepted for membership in the society is an admirable accomplishment in the life of a student. Any junior or senior medical student interested in Internal Medicine may make application, through a written request sent to the Department of Medicine. After reviewing the applicant's scholastic record, the Department notifies the student if he has been accepted. Once accepted, the student is required to maintain a high level of participation and achievement in the field of medicine and to participate actively in the Society's meetings (which are held monthly with compulsory attendance) in order to remain a member of the Society. Membership in the Society is limited to fifty students.

The purpose of the Society as stated in its constitution is "to promote the extracurricular, scientific, moral, ethical and philosophic discussion of the many phases of the art and science of Internal Medicine among the students." The Society is sponsored by Dr. Robert I. Wise, the Magee Professor of Medicine and Head of the Department, who together with the Society's faculty advisor Dr. Joseph Medoff, Assistant Professor of Clinical Medicine, offer active interest and encouragement to the Society and its members.

Each year two of the Society's monthly meetings generally consist of journal clubs at which time members read selected papers and discuss subjects pertaining to Internal Medicine. At other meetings experts in the

various branches of Internal Medicine, from Jefferson and other medical centers, are invited to speak before the Society. And annually a C.P.C. meeting is held in which the case records of a patient are presented and discussed.

The year's activities culminate in the Annual Lobster Banquet held in the spring at Old Bookbinders. The members then have the opportunity of visiting and exchanging ideas with members of the faculty, in addition to hearing addresses by eminent men in the field of Medicine. Included in the list of physicians who have spoken at the banquet are Dr. William B. Castle, the Francis Weld Peabody Faculty Professor of Medicine, Harvard Medical School; Dr. Wesley Spink, Professor of Medicine, University of Minnesota; and Dr. William Bean, Professor of Medicine, Iowa Medical College and Editor of *Archives of Internal Medicine*, all of whom hold honorary memberships in the Society. In addition to the keynote speaker of the evening, invitations are issued to the heads of the Departments of Medicine in the Philadelphia medical schools.

The Society is now entering its 74th year and looks forward to a successful year, success which has a solid foundation in a proud heritage beginning with Dr. Hare and continuing through the years with men like Patterson, Rehfuess, and Duncan.

Photo taken during the Annual Lobster Dinner of the Hare Honor Medical Society held May 1, 1964, at Old Bookbinders in Philadelphia shows (from left) Dr. William A. Sodeman, Dr. William Bean, and Dr. Thomas Durant, Professor of Medicine and Head of the Department at Temple University Medical School. Dr. Bean was guest speaker at the affair and Dr. Durant attended as a guest of the Society.

News of College Departments

ADMINISTRATION

DR. SAMUEL S. CONLEY, JR., Assistant Dean, was the main speaker of a Clinic Day session sponsored by Altoona Hospital on August 15th. His subject was "New Ideas in Medical Education."

MR. ROBERT T. LENTZ, Librarian, has been appointed Chairman of the Committee on Bibliographical Projects of the Medical Library Association.

ANATOMY

DR. ANDREW J. RAMSAY, Professor of Anatomy, Head of the Department and Director of The Daniel Baugh Institute of Anatomy, and Dr. Sigfrid Zitzlsperger, Associate Professor of Anatomy, participated in the sixth annual meeting of the Council on Medical Television held in Atlanta, May 19-22. Dr. Ramsay, as Chairman of the Board of the Council, presided at the meeting which was held at the Communicable Disease Center of the United States Public Health Service and its Audiovisual Facility.

The Council on Medical Television, originally a segment of the Institute for the Advancement of Medical Communication at the National Institutes of Health, gained independent status in March, 1964, through incorporation. Originally concerned chiefly with the development and adaptation of television techniques to improve communication between the Health Sciences Educational and Research Centers and Medical and Dental practitioners, particularly in the areas of postgraduate and continuing medical education, the Council has developed rapidly and now embraces activities in all of the health sciences, medicine, dentistry, nursing, veterinary medicine, and the various paramedical fields. The interest and activities of the Council are of course not

limited to the use of television alone but include all methods of audio and visual communication in relation to teaching and learning procedures.

The television techniques and the philosophy of their use in teaching anatomy, as developed and utilized first at The Daniel Baugh Institute of Anatomy, have served as prototypes for installations and usages in teaching anatomy (and other basic medical sciences) at many leading medical schools and undergraduate institutions.

DR. ALBERT W. SEDAR, Associate Professor of Anatomy, presented a paper entitled "Localization of the Succinic Dehydrogenase System in Bacteria Using Combined Techniques of Cytochemistry and Electron Microscopy" at the second International Congress of Histo and Cytochemistry at the University of Frankfurt, Germany, August 16-21, 1964.

DR. BERNARD J. MILLER, Assistant Professor of Applied Anatomy, has been awarded a research grant by the Council for Tobacco Research—U.S.A.

BIOCHEMISTRY

DR. ABRAHAM CANTAROW, Professor of Biochemistry and Head of the Department, was a member of the Program Planning Committee for the Fifth National Cancer Conference held in Philadelphia, September 17th through 19th.

MEDICINE

DR. ROBERT I. WISE, Magee Professor of Medicine and Head of the Department, spoke on "Fever of Unknown Origin" at the 1964 Symposium on Infectious Diseases held September 18th at the University of Kansas Medical Center, Kansas City, Kansas.

DR. JOSEPH J. RUPP, Associate Professor of Clinical Medicine, was one of six physicians who spoke at the symposium on "Obesity—Dangers of a Well-Fed Population" held in Chicopee, Mass., on June 17th.

DR. HERMAN L. RUDOLPH, Assistant Professor of Medicine (Physical Medicine), was elected President of the American Academy of Physical Medicine and Rehabilitation at the recent annual scientific session in Boston the week of August 23, 1964.

OBSTETRICS AND GYNECOLOGY

DR. WARREN R. LANG, Professor of Obstetrics and Gynecology, presented a paper entitled "Epithelial Regeneration in the Human Uterine Cervix" at the meeting of the American Association of Obstetricians and Gynecologists at Hot Springs, Va., on September 10th. The paper was prepared in collaboration with DR. GONZALO E. APONTE, Associate Professor of Pathology.

ORTHOPEDIC SURGERY

The Jefferson Orthopaedic Society will hold its Fifth Annual Meeting in McClellan Hall on October 29-30, 1964. Members expected to attend include alumni, former residents, and interns of the Jefferson Hospital. President Joseph Flynn of Orlando, Florida, will preside and discussions by DR. ANTHONY F. DE PALMA, James Edwards Professor of Orthopedic Surgery and Head of the Department, will follow.

OTOLARYNGOLOGY

DR. JOSEPH SATALOFF, Associate Professor of Otolaryngology, served as Associate Director of the fifth annual Postgraduate Course in Otolaryngology held at Colby College July 29-31. The course reviewed the fundamental principles and recent advances in Otolaryngology.

PHARMACOLOGY

The Jefferson Medical College Hospital is one of 32 institutions which has been accredited for the training of residents in hospital pharmacy by the board of directors of the American Society of Hospital Pharmacists. Jefferson's was the first accreditation to be granted.

DR. JULIUS M. COON, Professor of Pharmacology and Head of the Department, and DR. ROLAND W. MANTHEI, Associate Professor of Pharmacology, together with graduate students MR. WILLIAM LYNCH and MISS NAM HEE LEE attended the annual fall meeting of the American Society for Pharmacology and Experimental Therapeutics in Lawrence, Kansas at the University of Kansas, August 24-27. Dr. Manthei presented a paper entitled "Altered Hexobarbital Activity in Response to Dietary Stress" which he prepared with the help of Miss Lee.

PSYCHIATRY

DR. FLOYD S. CORNELISON, JR., Professor of Psychiatry and Head of the Department, attended the Annual APA Meeting in Los Angeles, May 4-8, where he delivered two papers: "Use of Motion Pictures in Teaching Behavioral Phenomena" and "Man's Urge to Leave the Earth." On August 17th Dr. Cornelison presented "Use of T.V. and Motion Pictures in Teaching Psychiatry in a Medical Center" at the Annual Meeting of University Film Producers Association in Oklahoma City.

DR. EDWARD GOTTHEIL, Associate Professor of Psychiatry, attended the American Psychological Association annual convention in Los Angeles, California, September 7-9, where he presented "Leader and Squad Attributes related to the Morale of Military Squads" and "Interaction of Leader and Squad Attributes Related to Performance of Military Squads." Dr. Gottheil was a co-author of both papers.

DR. GERALD R. CLARK, Assistant Professor of Clinical Psychiatry, attended the International Copenhagen Conference on the Scientific Study of Mental Retardation in Copenhagen, Denmark, from August 7th to 14th, and presented a paper entitled "Social Psychiatry in Mental Retardation." Following the conference, Dr.

Clark made a two weeks' tour of mental retardation facilities in Russia.

DR. LEO C. FREEMAN, Instructor in Psychiatry, recently lectured to the Elementary school teachers of Springfield Township on "Behavioral Disorders of Children and Problems of Management."

DR. ROGER D. FREEMAN, Instructor in Psychiatry, served as a panelist for Special Educators of Central Pennsylvania on the subject of "Psychiatric Aspects of Brain-Injured Children in the Classroom." The panel, sponsored by United Cerebral Palsy of Pennsylvania, was held at Dickinson College on March 28th.

DR. ROBERT S. GARBER, Instructor in Psychiatry, lectured on "Management of the Depressed Patient" before a group of general practitioners at Westbrook Psychiatric Hospital in Richmond, Va., on May 16th. On September 9th he presided over a meeting of the APA Commission on Manpower as Interim Chairman. September 11-13, Dr. Garber attended a Special Council Meeting of APA as a Presidential Appointee.

RADIOLOGY

DR. PHILIP J. HODES, Professor of Radiology and Head of the Department, and the staff of the Radiology Department participated in VII Symposium Neuroradiologicum held at the Waldorf Astoria in New York City, September 20-25, 1964. Dr. Hodes was on the committee planning the program and was a member of the

Public Relations Staff interpreting the developments discussed at the symposium for the lay press. On September 21st Dr. Hodes lectured and answered questions pertaining to the small bowel at a Clinic Day of Post Graduate Medical Education sponsored by the Long Beach Medical Association in Long Beach, California. October 2-9, Dr. Hodes led the American Delegation to the VIII InterAmerican Congress of Radiology in Caracas, Venezuela. In addition to leading the delegation, Dr. Hodes delivered the major address in which he discussed "Radiology Education in the United States." On October 10th he flew to Fargo, North Dakota, for the dedication of a new building at the Dakota Clinic. At this dedication all the visiting Darrow-Long Lecturers of previ-

ous years were reassembled for the symposium. Dr. Hodes was honored as the Darrow-Long lecturer in 1962.

DR. ROY R. GREENING, Professor of Radiology, lectured on pulmonary diseases at the Huntington, West Virginia, Veterans Administration Hospital on September 10th.

DR. JACK EDEIKEN, Associate Professor of Radiology, will deliver two refresher courses in the section on Radiology at the Southern Medical Association annual meeting in Memphis, Tenn., November 16 through 19. The courses will deal with his specialties, bone tumors and the arthritides.

DR. ROBERT O. GORSON, Associate Professor of Radiology (Medical Physics), has been named to the Board of Directors of the National Council on Radiation Protection and Measurements. The Council was created by an Act of Congress signed by the President on July 14, 1964.

The Department of Radiology was represented at the American Roentgen Ray Society Meeting in Minneapolis, Minnesota, held the week of September 29th by DR. GREENING, DR. GERALD D. DODD, Clinical Professor of Radiology, and DR. SIDNEY WALLACE, Instructor in Radiology, who gave a special course for the Radiologists at the meeting on Lymphangiography. This technique was extensively developed at Jefferson by Dr. Wallace.

SURGERY

DR. JOHN H. GIBBON, JR., The Samuel D. Gross Professor of Surgery and Head of the Department, was elected President of the Society for Vascular Surgery at its annual meeting, June 21, in San Francisco. On September 29th, Dr. Gibbon spoke on "Changing Concepts in the Therapy of Cancer of the Esophagus" before the Tennessee Valley Medical Assembly in Chattanooga, Tennessee.

UROLOGY

DR. PAUL D. ZIMSKIND, Assistant Professor of Urology, presented a paper entitled "Production of an Aperistaltic Ureteral Segment in Dogs" at the meeting of the American Physiological Society at Providence, Rhode Island, on September 10, 1964.

The Missing 49 Per Cent

JEFFERSON has many great traditions and one of them, of which we are very proud, is the loyalty of our Alumni as manifested through our 16 years of Annual Giving.

Last year 51% of our Alumni sent contributions—but what of the other 49%? We cannot believe that this large segment of our graduates is less loyal than those who contributed, yet this is the obvious conclusion. If you were one of the “missing” in last year’s Drive, we are sure that whatever the reason, it was *not* because of lack of affection for Jefferson.

We know from our years of experience in fund raising that the reasons people fail to contribute are numerous and varied. They range from procrastination, oversight and pressure of local charitable demands to family responsibilities, illness and actual financial hardship. In only a very few cases do Alumni fail to contribute because they do not feel the cause is a worthy one. These things we understand—but—we need each one of you in our all-out Drive for Jefferson!

So, if for any of these many reasons you did not contribute to last year’s Drive, please give most serious consideration to sending a gift during the present campaign.

Personal philanthropy in America has been a key factor in maintaining a free society and in no field is this better illustrated than in the field of medicine.

Alumni Annual Giving supplements other income for the increasing budgetary needs at Jefferson. We must have your gifts to help to strengthen the areas essential to effective teaching and learning.

At Jefferson emphasis is being placed on people, programs and facilities—in that order. To be a great medical school we must have an outstanding faculty, forward-looking programs and the best physical plant. We must continue to attract superior students for whom there is presently much competition. To enable us to excel in all areas, Jefferson badly needs the Annual Giving dollars of each of her Alumni.

We believe most sincerely that, given these facts, our loyal Alumni will respond to our appeals. Indeed, we are so very convinced of this, as well as vitally aware of Jefferson’s needs, that we have increased the goal for the 17th Drive to \$200,000.

It is very obvious that to achieve this truly impressive figure, we must depend on receiving gifts from those of you who have not been regular contributors. We believe these “new” gifts will be forthcoming, for we believe that all Jefferson Alumni will want to be part of the exciting things that are happening at your College.

The feeling of progress is in the very air here at Jefferson. Our expansion and the changes that are taking place are not haphazard. They are following well-defined, well-thought-out programs for the betterment of the College. But, all of them take money and Jefferson needs some of yours.

J. WALLACE DAVIS, M.D.

Chairman

Annual Giving Fund Committee

Dr. Perkins to Celebrate his Seventieth Birthday

DR. William Harvey Perkins, one of Jefferson's most beloved and distinguished alumni, celebrates his seventieth birthday, October 21, 1964. He was born in Germantown, Pennsylvania, and graduated from Central High School of Philadelphia. He entered Jefferson Medical College as a student in 1913, graduating in 1917. He completed his internship at the Jefferson Medical College Hospital in 1918 and entered the Medical Corps of the United States Army, serving in France.

Early in his career he had two tours of duty in Thailand. He served as a medical missionary in the Northern part of the country from 1919 to 1923, and had a most interesting and exciting experience in this medical outpost. Three years later, following service as a Rockefeller Foundation fellow in Medical Education, the Rockefeller Foundation and the Siamese Government (now Thailand) offered him the Professorship of Medicine at the Faculty of Medicine at the Chulalongkorn University in Bangkok, a position he occupied from 1926 to 1930.

For his valuable contributions to medical education in Bangkok he was decorated with the highest honor, the Order of the White Elephant by the King of Siam in 1930.

Upon his return to the U.S. in 1930, Dr. Perkins was appointed Instructor in Medicine at the Tulane University School of Medicine in New Orleans and the following year, with support from the Commonwealth Fund, a full-time new Department of Preventive Medicine was established at Tulane with Harvey Perkins at its head. Two major accomplishments must be cited from the Tulane era. In 1938 he established a Health Maintenance Clinic at Tulane and initiated the teaching of clinical preventive medicine, a truly pioneering activity. In 1938 his textbook *Cause and Prevention of Disease* was published by Lea and Febiger. A second volume entitled *Evolution and Progress Under Natural Law* was privately published by Dr. Perkins about one year ago.

In 1941, Jefferson Medical College called its distinguished son to return as Dean and as Head of the Department of Preventive Medicine, a newly-created department. War time problems of enormous magnitude confronted the new Dean, but he discharged both his administrative and teaching responsibilities with alacrity and distinction for nearly ten years. Here at Jefferson he established a Health Maintenance Clinic, first at Fife Hamil Health Center and subsequently at the Curtis Clinic. He resigned from the Deanship on November 6, 1950, but continued as Professor of Preventive Medicine and Head of the Department until August 31, 1959, when he became Professor Emeritus of Preventive Medicine.

He has been awarded honorary degrees by Franklin and Marshall College, Dickinson College and Jefferson. The Class of 1917 presented Dr. Perkins' oil portrait to the Medical College in 1951, painted by Cameron Burnside.

Dr. Perkins is a member of numerous medical societies, and he has been active in the Health and Welfare Council of Philadelphia and many other local and national medical and civic organizations. He is frequently credited with the planning for the ten District Health Centers of the City of Philadelphia. In August 1958 the Section on Public Health, Preventive and Industrial Medicine of the College of Physicians of Philadelphia established an annual William Harvey Perkins award for the best essay on a subject pertaining to Preventive Medicine submitted by a student in any of the five Philadelphia medical schools.

The decade of Harvey Perkins' Deanship at Jefferson was a critical one in the distinguished evolution of this great medical center. His geniality, seriousness of purpose and scholarly bent left a wonderful imprint on the institution, its faculty and student body. This native Philadelphian has brought great credit to the City of Brotherly Love and to his Alma Mater throughout his long professional career.

A dinner in honor of Dr. Perkins' birthday was given him by his friends and colleagues on October 21st at Kugler's Restaurant.

May we all hope to help him celebrate his eightieth birthday in 1974.

E. HAROLD HINMAN, M.D.

PLEASE NOTE:

Orders for Jefferson chairs must be received
before November 25, 1964
in order to assure delivery by Christmas.

What Jefferson Has Done For Me

*by Harry W. Baily, M.D.
Class of 1917*

I MUST say that attending Jefferson Medical College, graduating in 1917, has changed the course of my whole life. I well remember the freshman year, organic chemistry was added to the course because in 1914 that subject was required by the state board; also I remember Dr. Rosenberger's interest in me when he requested that I spend a day in his laboratory so that he might quiz me on the different elements of the blood. I have never forgotten that kindness and I must thank him for my remaining to finish the course.

After graduation, a year at Frankford Hospital gave me the opportunity to meet and work under Professor Charles Nassau, who after the war began, asked me if I desired to join the Jefferson Unit Base Hospital 38. I enlisted, received my first lieutenancy, and was told to see Professor Coplin, Chief Medical Officer of the Unit. I did and during the interview he asked me how much I knew about medicine and surgery. I assured him I knew a little and at once he said, "I will accept you for being so frank."

We had our headquarters at the Second Regiment Armory, Broad and Susquehanna, and drilled in Fairmount Park until we went overseas in the spring of 1918, arriving at Nantes, France. Our hospital buildings were not yet completed. I was assigned to help out the Episcopal Unit on the other side of Nantes, travelling there by truck each morning and returning in the evening. Dr. Emory G. Alexander, Dr. John B. Devers' son-in-law, was my chief. There were quite a few knee and elbow cases, badly infected. Dakin solution was the routine treatment. It was soon noted that some cases coming in did better in the presence of maggots and molds than with the Dakin solution. Records were kept by Dr. Alexander after using normal saline solution, maggots and mold. After a month, I returned to the Jefferson Unit and was told to contact Dr. Alexander in the States after the war concerning our findings.

The unfortunate occurrence to Dr. Alexander ended the experiments. Unfortunately, maggots were used and mold was forgotten.

After the Armistice, the patient load diminished. I had the opportunity to care for all races and colors for contagious diseases and it was interesting to note how many contagious diseases were contracted by fraternizing with the French population, including diphtheria, scarlet fever, chicken pox, measles, as well as venereal.

Late in January 1919 relief was coming from the States and the older men and those with children were ordered home; we single ones had to remain in Europe.

Soon post graduate courses were offered by the Y.M.C.A., by universities and hospitals. We had heard so much about Edinburgh University and the Royal Infirmary that three of us—Drs. Louis Englerth, Billy Williamson, and myself—decided to attend. We soon discovered that only university graduates were accepted. We appealed to Dr. Nassau who knew Dr. W. W. Keen was an honorary member of the Royal College of Surgeons of Edinburgh and he immediately wrote Dr. Keen who verified the fact that Jefferson Medical College was a university since 1835 and we were immediately accepted.

We joined the English Speaking Union and enjoyed the fellowship of many doctors who served Britain in all parts of the world as well as the good meals at the Club. The spring course finished, we applied for admittance to the Royal College of Surgeons of Edinburgh—F.R.C.S.E. For the larger part of a week we took all kinds of examinations, did operations, examined specimens, slides, and various other tests, and had to identify many old instruments invented and used by relatives of the staff. Some of the questions in the written examination were to secure information from us as to the newer methods used in the States in medicine and surgery. The usual time for study and experience was five years before one felt eligible to apply for the F.R.C.S.E. I had just two years and did so well that I was requested to remain six months and I was assured I would pass the required tests. I again must say thanks to Jefferson for the training I received there.

tea for the Daniels

Many interesting things occurred in Europe and I will cite a few while overseas. After the cessation of the War, Secretary of the Navy Josephus Daniels and his wife visited Edinburgh. We arranged to have a tea for them. (The Daniels were teetotalers.) For some reason after the greetings, I walked into the room, then occupied by the Y.M.C.A., with Mr. and Mrs. Daniels and I must say they were the most gracious couple I ever met. Mrs. Daniels, in the course of our conversation, asked where I lived. I said that I was part of the Jefferson Medical College Hospital Unit stationed in Nantes, France, and was going to school in Edinburgh. She immediately inquired if I knew Mrs. Eastman and Mrs. Scranton (Governor Scranton's mother) who were Re-

publican Chairmen of the Auxiliary of their party, and said they were dear friends of hers. Mrs. Daniels was a Democrat (the old saying, politics makes strange bedfellows). I assured her that I had seen Mrs. Eastman at the Jefferson Hospital just before I left the States and that she appeared well. However, I explained that I only knew her by sight.

When we entered the room, Mrs. Daniels still talking, only a few chairs remained unoccupied in the center of the gathering. Mr. and Mrs. Daniels motioned me to sit next to them; on either side was the Dean and his wife. The Dean had just been honored by the King. During the conversation, Mrs. Daniels leaned over and asked me if I remembered the name of the person opposite us wearing an Alice blue dress, but I saw two, one to the right, the other to the left. I said, "Mrs. Daniels, which lady are you referring to, the one to the right or to the left?" Immediately the newly-elevated Dean's wife informed me that she was was no lady, that she was the only Lady —— present and that her husband, the Dean, was Sir —— . I could have fallen through a crack in the floor had there been one.

the diplomatic answer

The next day I saw Secretary Daniels and asked him what he thought of the incident the day before and he said, "Wasn't that awful?" Still later I was on leave for ten days and travelling through London on the way to the French Riviera, I again met Mr. Daniels and again I asked him what he thought of the incident and he again gave me the diplomatic answer, "Wasn't that awful?"

The last time I saw the Daniels was in 1935 while attending a Rotary convention in Mexico City. Mr. Daniels was then Ambassador to Mexico. I called on him and Mrs. Daniels at the Embassy and was greeted like an old friend. Again I must say they were the most gracious couple and I am told that F.D.R. always spoke of Secretary Daniels as the Chief, even during his presidency. F.D.R. was Assistant Secretary of the Navy under Daniels during World War I.

Other amusing incidents occurred—one with General Douglas Haig, British Commander, who was in Edinburgh in February 1919. We were fortunate enough to meet him and asked him if he would like to accompany us to the cemetery just outside Edinburgh on February

12th and make some remarks about Abraham Lincoln. He immediately accepted and about 30 of us marched before the statue of Lincoln and he made a fine address. A few days later the Commander was laureated at the University of Edinburgh and in his remarks he paid glowing tribute to the British tommies who won the war. He was about to finish when he looked up and saw us in a lower box. He hesitated, his face turned a little red, and then he finished by saying we also must not forget our American cousins from overseas who gave a great deal of help and furnished supplies.

On one leave to the South of France, I met Prince Pierre—Princess Grace Rainier's father-in-law. I also visited the then famous Rotunda Hospital in Dublin, Ireland, and met and listened to anatomist Cunningham lecture on anatomy and he gave me a message for Dr. Schaeffer.

returning to the states

Time came to come home in July 1919 and at Pontenien Camp, Brest, France, I met Marine General Smedley D. Butler (afterward Director of Public Safety of Philadelphia) and did medical duty until the next ship would leave. He tried to persuade me to remain with him but when the new German liner Zeppelin (captured during the war) was ready to sail for home, I was on it. We were all glad to get back to the States.

At that time Philadelphia did not appeal to me so I returned to my hometown of Tamaqua and entered general practice, some minor surgery, then EENT, received appointments as surgeon for railroads and mining companies. Later I was on the staffs of Pottsville Hospital and the State Hospital at Coaldale. Appointments came rapidly to the U.S. Veterans Bureau, Tamaqua Board of Health (41 years—21 years as President), numerous compensation insurance companies and medical examiner for many of them. I was made a life member of Phi Chi medical fraternity, life member of Gill Memorial Hospital, Roanoke, Va., for EENT; after which I was made a member of the Pennsylvania Academy of EENT. In 1943 I served as President of the Schuylkill County Medical Society and in 1960 as Lehigh Valley Medical Society President. Governor Lawrence of Pennsylvania gave me a citation, certificate and a lapel

pin at a banquet for serving over 25 years at the State Hospital, Coaldale.

presidential citation

Fraternally, I am past president of the Tamaqua Rotary Club (1931), life member of the Elks and Masons and American Legion. I well remember, when in Paris, Dr. Michael Burns and I went to one of the hotels to help formulate plans for the American Legion.

Since 1939 I have examined enlistees for the Armed Services and later I was appointed Medical Examiner for the local draft board. President Roosevelt three times honored me for my uncompensated services and each time I received an appreciation certificate. Presidents Truman, Eisenhower, and Kennedy also issued me appreciation certificates and each five years a lapel pin was given me for my aid to the government. This last certificate was signed by President Kennedy, Governor Lawrence of Pennsylvania, General Louis B. Hershey, Director of the Selective Service, and State Director of Selective Service Gross. A letter accompanying regretted the omission of a banquet and personal presentations due to scattered locations of participants.

working every day

I also received citations from the Tamaqua Rotary Club and the State Y.M.C.A. and certificates and plaques from St. John's Evangelical Lutheran Church.

My hobby is working every day, and every second year I travel to any part of the world. Many countries of Europe I visited many times and the only three areas I missed are Russia, India, and Australia. However, time is getting late and I think at 71 I should be thinking about taking up golf.

I must say in all the countries I visited, Jefferson is considered the best medical college and usually the famous men she produced are mentioned, so I am glad I went to Jefferson and I for one will continue to support her and I ask others to do likewise to the best of their ability.

MARTIN E. REHFUSS

Doctor of Medicine

Professor of Clinical Medicine, Emeritus

8 August 1887—29 July 1964

Professor Rehfuss was an active teacher in the Jefferson Medical College from 1914 until his retirement in 1952. He was one of the great leaders in the field of gastroenterology. Even today, every student knows the Rehfuss tube. Students of another generation knew Martin Rehfuss as representing a period of elegance in medicine. He had served his time in France and in Germany in the days when art and science were beginning to come together in medicine. He had profound respect for both and used his acquired skills and his instinctive touch to the glory of the profession. He was immaculate in all things and to many he was the very image of the distinguished specialist. But he was a gentle and understanding practitioner.

Martin Rehfuss was truly a physician.

ROY WILLIAM MOHLER

Doctor of Medicine

Class of 1921

Clinical Professor of Obstetrics and Gynecology, Honorary

26 December 1892—6 August 1964

For nearly a half-century Roy Mohler was a part of this institution and most certainly Jefferson was an integral part of Roy Mohler. As a member of the old guard he was ever ready with criticism but his loyalty to the cause was never questioned. As Clinical Professor of Obstetrics and Gynecology he pursued the maxims of the Oath with patience and with skill. He was a friendly preceptor who found in teaching enormous and satisfying rewards. He achieved great distinction but always remained a gentle physician and a wonderful friend.

PHILIP HOWARD WIRT GEISLER

Doctor of Medicine

Class of 1955

Assistant Professor of Pathology

15 June 1925—9 July 1964

Kindly physician, thoughtful
teacher, ardent investigator:

He was one of ours.

CENTURY CLUB

SIXTEENTH ROLL CALL

ALUMNI ANNUAL GIVING FUND

The names of the alumni, their widows, and faculty members who have responded to last year's Fund appeal by contributing in amounts of one hundred dollars and over are listed here in grateful appreciation. Your Committee for the past twelve years has invited all who could contribute in these more substantial amounts to give thoughtfully and proportionately, and has instituted the "Century Club" acknowledgment of these gifts. The six hundred and ninety-eight alumni and friends recorded on this roll contributed more than half of last year's Fund amount. Warm thanks are again expressed by the Alumni Fund Committee of Jefferson Medical College for all gifts, regardless of size, made to advance the progress of our Alma Mater.

 *Bequest

Make plans now to attend the Annual Business
 Meeting and Dinner on February 25, 1965.

Place to be announced.

CLASS NOTES

Dr. McCelvey is pictured above with his great-grandson.

1894

DR. JOHN S. MCCELVEY, 804 North 11th St., Temple, Texas, was featured in the *Temple Daily Telegram* on the occasion of his 94th birthday. Born on July 15, 1870, in Houston County, Texas, he and his parents settled in Temple in April, 1884, three years after the city was founded. In recalling his Temple school days, Dr. McCelvey says, "We were all crowded into one room, all ages, sizes and shapes. It was impossible for the teacher to keep track of everybody. We soon learned when it would be our turn to recite, so a bunch of us boys would jump out the window and play marbles until our turn came. The teacher would never miss us."

After graduation from Temple High School, Dr. McCelvey attended the University of Texas, and from there to Jefferson Medical College. Following graduation he was a resident physician in Red Bank (N.J.) Hospital for Children, then spent some time in Philadelphia working among the poor. He returned to Texas where he practiced for a year and then went abroad for special study in hospitals in Berlin and Dresden, Germany. He remembers seeing "the young Kaiser" many times in Germany—"a very brilliant fellow, but it was quite clear that he wanted to become a war lord."

Returning to Temple to practice in 1897, Dr. McCelvey played a leading role

in establishing King's Daughters Hospital, endorsing notes for the hospital association and donating the hospital's first operating room. He also played a major role in the establishment of a junior college in Temple. He also found time to improve himself professionally by visiting special clinics and taking postgraduate courses. He is a former member of the State Health Board and onetime member and Secretary of the State Board of Medical Examiners. He is also a fellow of the American College of Surgeons.

Today Dr. McCelvey's physical activity is diminished but not his interest. Asked what advice he would give to younger men to stay healthy, he says, "Don't eat too much." (By his own admission he has always been a hearty eater.) "No smoking." (Dr. McCelvey laughingly admits he chain-smoked roll-your-own Bull Durham cigarettes until he was 90, ruining many a tie and shirt with hot ashes in the process.) In a more serious vein he says, "I don't know why so many young people die so early today. Of course, the biggest killer of all is heart disease. It must be the strain, the tension, the worry, perhaps soft living. When I was practicing years ago people seemed to have a natural immunity that they don't have now. They lived simply. As for me, I've always tended to my work as best I could and not worried."

1913

DR. ROBERT WAYNE RICHARDS had planned to attend the International Jamboree at Valley Forge in July, but death decreed otherwise. He was there in spirit, though, through the "Doc" Richards Jamboree Memorial Fund established by the Elk Lick Council to enable several boys to attend the encampment who were unable to pay their own expenses. An ardent Boy Scout organizer and booster, he had attended all the jamborees held in Potter County. He was one of the original organizers of the Shinglehouse (Pa.) troop. His long service brought national recognition when he was presented the Silver Ante-

lope Award, the only scouter in the history of Elk Lick Council to receive this citation.

Another tribute to his memory was paid when a certificate, with the gold insignia of the United States and signed by President Johnson, was received by Dr. Richard's daughter, Mrs. Robert Davies, about two weeks after the doctor's death. The certificate reads: "The United States of America honors the memory of Robert W. Richards. This certificate is awarded by a grateful nation in recognition of devoted and selfless consecration to the service of our country in the Armed Forces of the United States."

1924

DR. HENRY M. WEBER, 82-259 Miles Ave., Indio, Calif., was named "Humanitarian of the Year" at the convention of California State Garden Clubs, Inc., held in Los Angeles in May. The award was presented to Dr. Weber by Cleveland Amory, Associate Editor of the *Saturday Evening Review* and Director of the Humane Society of the United States. Dr. Weber, a retired Commander of the Medical Corps, U. S. Navy, has devoted his life to conservation projects and civic affairs. This is only one of the many awards which Dr. Weber has received. An award in the form of a gold orange was awarded to the "Man of the Year" by the California Garden Clubs as "symbolic of the ever present golden opportunity for civic progress, cultural development and community service." He was named for the John J. Lawler Memorial Award given to the one who has the "greatest potential," and was awarded the coveted Honor Award from the California Conservation Council. He has also received the Award of Merit from the National Wildlife and California Wildlife Federation.

Besides a rich background in humanitarianism, Dr. Weber is a fine painter of wildlife and desert scenes. "My purpose in painting wildlife is not only to show them in their native haunts, but to tell a story in the interest of conservation." He explains that many animals and birds are being hunted out of existence. He is Chairman or on the board of directors of innumerable organizations devoted to conservation, wildlife, and forestry. He takes an active interest in conservation projects in the schools, and is a Boy Scout counselor.

He was chosen as a delegate to the first World Conference on National Parks held in Seattle, Washington, in 1962.

At present he and his wife, also an avid conservationist, are touring the country in their Travel Trailer on a conservation project in which Dr. Weber is taking many photographs and intends to do some painting.

1928

DR. LERLEEN C. HATCH retired July 31st as medical director of The Good-year Tire and Rubber Company after 22 years of service. His ideas on retirement are very definite. "To gain the maximum success from retirement," he says, "a person, naturally, should enjoy good health, and there should be two participants. Husband and wife should enjoy retirement together. If retirement is planned and pursued with reasonable effort, it should be a rewarding experience."

DR. PAUL G. HOLSINGER, 104 Blair St., Martinsburg, Pa., has retired from the practice of medicine. Genealogy has been his lifetime hobby and he is author of the *Holsinger Family History*. Dr. and Mrs. Holsinger have purchased a trailer and plan to travel in search of further genealogical data, visiting court houses and cemeteries.

1930

DR. RICHARD B. NICHOLLS, 750 Graydon Ave., Norfolk 7, Va., was recently elected as Vice President and President-elect of the Medical Staff of the Norfolk General Hospital for 1964-1965. He will begin a year's tenure as President of the Staff in May 1965. Dr. Nicholls has been in the practice of Obstetrics and Gynecology in Norfolk since October 1932.

1931

DR. JOHN N. BORBONUS, 52 Cowperthwaite Place, Westfield, N. J., writes that he is no longer actively practicing medicine, at least for the time being.

1933

DR. DANIEL C. BAKER, JR., 903 Park Ave., New York, N. Y., has been named Chairman of the Department of Otolaryngology at Columbia University's College of Physicians and Surgeons and Director of the Service of Otolaryngology at Presbyterian Hospital. Dr. Baker comments, "It all started with Dr. Louis Clerf who took me under his wing from 1935-1937." Dr. Baker has been affiliated with the Columbia-Presbyterian Medical Center since 1937.

DR. JAMES A. FLAHERTY, 1105 N. Franklin St., Wilmington, Del., has been appointed to the Board of Trustees of the Delaware State Department of Mental Health. He is the first psychiatrist ever to be a member of the board in the 75-year history of the state's mental health system.

1935

DR. ROBERT A. McLANE, 59 Nassau St., Uniontown, Pa., has been appointed District Medical Director for U. S. Steel's Frick district. For the past six years Dr. McLane has served as Chief of Medical Services at U. S. Steel's Donora works.

DR. HERMAN L. RUDOLPH, 400 N. 5th St., Reading, Pa., was recently installed as President of the American Congress of Physical Medicine and Rehabilitation at the group's 26th Annual Congress in Boston, Mass.

DR. PHILIP R. WIEST, 238 N. 6th St., Reading, Pa., has been named a Director of the Richland National Bank. Dr. Wiest is following in the footsteps of his father and grandfather who also served as Directors of the bank. Dr. Wiest also serves as treasurer of the firm of Joseph O. Flatt and Co., Inc., and Chief of the Department of Otolaryngology at Reading Hospital.

DR. WILLIAM WINICK, V. A. Hospital, Brockton, Mass., represented Jefferson at the inauguration of The Very Reverend John Thomas Corr, C.S.C., as President of Stonehill College on October 9th.

1937

DR. DANIEL WILNER, 108 S. Sumner Ave., Margate, N. J., has been appointed Radiologist for Burdette Tomlin Memorial Hospital. The author of numerous articles in the field of Radiology, Dr. Wilner has been conducting a research project in addition to his regular practice for the past 15 years on bone tumors, the results of which will soon be published as a textbook. One of his recent research projects on the relationship of Paget's Disease to cancer of the bone will be published in the fall in booklet form by the Eastman-Kodak Company.

1939

DR. ARNOLD V. ARMS, 4320 Wornall Road, Kansas City 11, Missouri, represented Jefferson Medical College at the inauguration of Robert P. Foster as President of Northwest Missouri State College on October 6th.

1941

DR. JOHN C. CRESSLER, Col., Walson Army Hospital, Fort Dix, N. J., has assumed command of Walson Army Hospital and will also serve as Post Surgeon. He formerly served as Second U. S. Army Surgeon at Fort George G. Meade, Maryland.

DR. RICHARD E. FLOOD, 1480 Covehill Road, Weirton, Cove Station, West Virginia, was elected Vice President of the West Virginia Medical Association at the Association's 97th convention in White Sulphur Springs, W. Va.

1943

DR. GERALD E. CALLERY, 111 Long Lane, Upper Darby, Pa., piloted his Cessna 180 Amphibian to Alaska in June. He flew up the Alaskan highway and into the Arctic Circle. En route he stopped to see PHILLIP SMITH in Glasgow, Montana. Dr. Smith, also a pilot, has a Cessna 210. Dr. Callery reports that he tried to contact JOHN OWEN in Seattle, but was unable to do so.

J'44

DR. JOHN C. KELLEHER, 328 22nd St., Toledo 2, Ohio, was unable to attend his Class Reunion in June, but he did send a recent photograph of himself and his family, which depicts nine good reasons why it was probably difficult for "Dad" to get away.

DR. STEPHEN R. WETMORE, 214 Taylor Ave., Easton, Pa., has been named College Physician and Director of student health services at Lafayette College. He is the first physician to head the college's health service on a full-time basis since it was established in 1922. Dr. Wetmore was formerly Associate Director of student health at Rutgers University.

Dr. Wetmore

Dr. Callery and Dr. Smith (left) are pictured in front of Dr. Callery's plane.

S'44

DR. ANGUS BRENNER, 1400 York Rd., Abington, Pa., has been appointed Co-Chief of Obstetrics and Gynecology at Abington Memorial Hospital.

DR. FREDERICK M. DOUGLASS, Maumee Valley Hospital, 2025 Arlington Ave., Toledo, Ohio, represented Jefferson at the inauguration of the new President of Bowling Green State University on September 16.

1946

DR. NORMAN MCLEAN SCOTT, JR., 11101 Conti Place, Silver Spring, Md., was recently promoted to the rank of colonel in the U. S. Army Medical Corps. Dr. Scott serves in the dual capacity of Chief of Gastroenterology at the Walter Reed General Hospital and as Chief of the Department of Gastroenterology at Walter Reed Army Institute of Research. He is a member of the American Federation for Clinical Research, American Gastroenterological Association, American Society for Gastroenterological Endoscopy and the American Medical Association, and is the holder of the Army Commendation Medal.

1947

DR. CHESTER L. SCHNEIDER, 6340 Ventnor Ave., Ventnor, N. J., writes that it's

furlough time again and that he and his family will be spending it in one of the apartments of the Houses of Fellowship, established many years ago by the estate of the hymn-writer William H. Doane in Ventnor.

1950

DR. FRANK R. HENDRICKSON, 300 N. Scoville, Oak Park, Ill., joined four other nationally prominent specialists in a panel devoted to cancer of the mouth and throat during the Fifth National Cancer Conference in Philadelphia, September 17-19. Dr. Hendrickson discussed radiotherapy and its use in treating various kinds and positions of cancer. Recipient of two American Cancer Society research grants, he is attending radiologist and director, section of radiation therapy, at Presbyterian-St. Lukes Hospital, Chicago, and Assistant Professor of Radiology at the University of Illinois College of Medicine.

1952

DR. GEORGE F. GOWEN, 1126 Maplecrest Circle, Gladwyne, Pa., has been appointed Director of the Department of Surgery at Misericordia Hospital.

1953

DR. JEROME ABRAMS, 323 W. 9th St., Plainfield, N. J., served as a delegate to the 6th World Assembly of the Israeli Medical Society in Haifa. Dr. Abrams

and his wife, Rosalyn, a specialist in Cytology, presented a joint paper on Gynecologic Cytology to the Medical Society. Dr. Abrams is a member of the American Physicians Fellowship, an organization which awards scholarships to Israeli physicians coming to study in the United States.

1955

DR. MICHAEL F. FISHTER, 18 North Main St., Lewistown, Pa., has been appointed to the Medical Staff of the Lewistown Hospital as a member of the associate staff in the Department of Medicine. He will specialize in the practice of psychiatry and neurology.

DR. LEON A. PERIS, 2023 Mather Way, Elkins Park 17, Pa., writes, "I am in partnership with BURT WELLENBACH, practicing Obstetrics and Gynecology, mainly at Jeff. I am also responsible for the genetics and genetic counselling teaching program in our department."

DR. F. WILLIAM SUNDERMAN, JR., University of Florida College of Medicine, Gainesville, Fla., has been named Associate Professor of Pathology and Director of Clinical Laboratories at the U. of Florida College of Medicine. He was formerly on the faculty of Jeff.

1958

DR. DAVID J. JONES, III, 2710 Lantern Lane, Audubon, Pa., has been appointed

Photo shows Dr. Scott (center) with Lt. Gen. Leonard D. Heaton (left) and B/Gen. Henry S. Murphey.

Chief of the Adult Health Section in the Community Health Services component of the City Health Department of Philadelphia.

DR. JAMES LABRAICO, 116 Iroquois Rd., Bristol, Conn., writes, "I have just finished a year's fellowship in allergy and pulmonary disease at the Pratt-New England Center Hospital which is part of the Tufts University Medical School. Have been on the move ever since graduation and my wife and two children are happy to be settled here in Bristol. I would certainly enjoy hearing from anyone passing through this area."

DR. LEON P. SCICCHITANO, R.D. #1, Ashland, Pa., has been appointed to the Consulting Medical Staff of Shamokin State General Hospital.

1959

DR. MARTIN RUBEL, Park Drive Manor, Apt. B-813, Lincoln Drive and Harvey St., Philadelphia, Pa., has been appointed Staff Psychiatrist at the Philadelphia Psychiatric Center.

DR. SAMUEL L. STOVER, 16 Penn Ave., Souderton, Pa., has been awarded a Wyeth Laboratories residency fellowship in Pediatrics. Dr. Stover served his internship at St. Luke's Hospital, Bethlehem, Pa., and is taking his residency at The Children's Hospital of Philadelphia.

1961

DR. RICHARD L. EDDY, The Lahey Clinic, Boston, Mass., recently began a residency in internal medicine at the Lahey Clinic. He writes, "I was recently discharged from active duty in the U. S. Navy Medical Corps. My future plans encompass completing my internal medicine training in Boston and probable additional training in the field of hematology."

ENGAGEMENTS

1959

DR. TOM DUNBAR HALLIDAY to Cynthia Patterson Moore.

1960

DR. MILTON LOUIS FRIEDMAN to Shirley Mona Brown.

WEDDINGS

1960

DR. FRED CARPI CRISTOFORI to Roberta Holt, August 29, 1964.

1960

DR. HERBERT M. EPSTEIN to Susan Nina Schonberg, August 14, 1964.

1962

DR. JOSEPH SNYDER to Madrian Carole Friedman, August 9, 1964.

1964

DR. HECTOR JOHN SEDA to Linda Lee Roth, June 20, 1964.

BIRTHS

1955

A son, William Thompson, III, to DR. AND MRS. WILLIAM T. HOLLAND, JR., July 24, 1964.

1960

A daughter, Virginia Ann, to DR. AND MRS. ALFRED J. FINN.

ALUMNI PLACEMENT BUREAU

Positions Available

THE Wisconsin State Board of Health is in need of an assistant Director of the Section on Community Health Services and also an Assistant Director of the Section on Preventable Diseases. Both positions require possession of an MPH degree, four years of experience in public health administration and certification by the American Board of Preventive Medicine. Starting yearly salary for both positions is \$18,648. with further increases to \$20,448.

THERE is an opening for an internist in the Nebraska panhandle in a metropolitan area of 22,000. There are two hospitals nearby with both specialists and general practice men. It is an excellent area for a person desiring to live in a smaller community where recreational, hunting, and fishing opportunities are plentiful.

JEFFERSON Alumnus, Class of 1951, seeks a recent graduate to assist him in general practice in an

island community off the west coast of Florida. Florida license is required.

A GENERAL practitioner in central New Jersey is in need of an associate to assist him with his practice, which is located in a rapidly growing community with excellent hospital facilities. The salary is dependent upon qualifications.

SMALL community about 45 miles from St. Louis, Missouri, with good transportation facilities needs a general practitioner because of death of doctor. The practice consists of about 500 families and is located near a hospital.

OCEAN City, Maryland, and Berlin, Maryland (eight miles away), are in desperate need of a general practitioner since the death of Dr. N. R. Thomas, Jeff. '39. This is an excellent opportunity with a well-equipped office. Any arrangement which is suitable to the applicant will be set up.

Make your reservation now
for a thorough physical examination
during Commencement Week.

CALENDAR OF FUTURE EVENTS
